Maule's Superior Vegetable Seeds

We Strongly Recommend All Varieties Listed In Bold Type With Clover Marks

Artichoke

2 Green Globe Artichoke

2 Green Globe

The Favorite Garden Variety. Cooked and Eaten Like Asparagus

A standard variety, grown for its flower-heads. The plant is of medium height with rather deep green leaves. The buds or flower-heads are green, nearly round or somewhat elongated, which are cooked like asparagus. It is considered a delicacy and demands a high price in all better city markets. Requires warm weather to grow to perfection and gives a high yield.

Pkt. 15c; ½ oz. 40c; oz. 75c; ¼ lb. \$2.15; ½ lb. \$4.00; lb. \$7.50, postpaid

Asparagus

For Roots of Asparagus, See Page 61 in This Seed Book

CULTURE—Sow in the early Spring in drills 2 to 3 feet apart, scattering about 1 inch apart in the drills. Cover with 1 inch of soil; cultivate freely. A packet will produce

about 200 plants; an ounce, about 750 plants; 4 to 5 pounds to the acre. The following spring set out the roots in a permanent bed.

1 Palmetto

A Favorite Variety. Produces large, always green Asparagus

One of the most profitable asparagus on the market; mammoth in size, dark green, heavy yielding and early producing. A standard variety for all purposes. Always commands a high price in all markets.

Pkt. 10c; oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c; 2 lbs. \$1.25; 5 lbs. \$3.00; 10 lbs. \$5.50, postpaid

* 4 Mary Washington Rust-Resistant

The Newest Creation in Asparagus for the Home Garden or Market

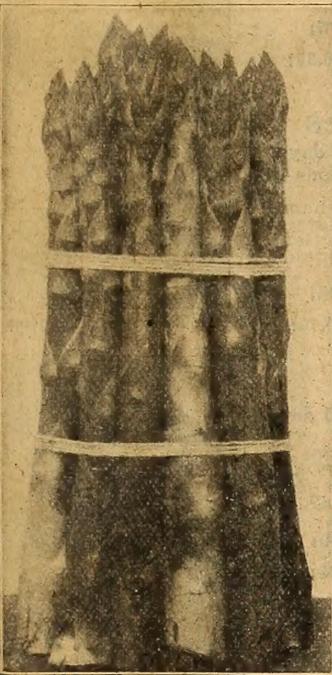

This rust-proof asparagus is the result of years of plant breeding, conducted by the Bureau of Plant Industry of the U. S. Department of Agriculture, with the object of eliminating rust, which has heretofore proven so disastrous to asparagus crops in all sections. This strain is not only practically free from rust and other diseases, but it is also larger and more vigorous. In color it is a dark green, with a heavy over-cast of rich purple. Has a tight, pointed bud, and does not branch out until well beyond the market height. Makes a clean, straight growth. Produces the finest kind of green asparagus, both for home use or market. In appearance, when bunched for market, this asparagus can not be excelled. If you already have an asparagus bed it will pay you to plant some of this variety and note the improvement over the kind you are now growing. Our roots are the best we ever grew. While our stock is large, the demand has been very great, so advise ordering early.

Pkt. 10c; oz. 20c; ¼ lb. 60c; ½ lb. 95c; lb. \$1.75; 2 lbs. \$3.10; 5 lbs. \$7.50; 10 lbs. \$13.75, postpaid

50X41

Asparagus Book

A reliable treatise on Planting, Cultivating, Cutting, Packing and Canning. Illustrated, cloth bound book, by HEXAMER. \$1.10, postpaid.

4 Mary Washington Asparagus

Broccoli

Known as Winter Cauliflower

CULTURE.—Sow seed early in May. Set plants out in June or early July in rows two to three feet apart each way. Cultivate same as Cauliflower which it resembles. A packet will produce about 250 plants, about 3,000 plants to an ounce. Ready to use in 150 days.

* 103 Early Angiers

Large White Heads. 150 days
The large white heads are handsome; of delicate flavor. More hardy than Cauliflower. Grown extensively in the north-west for shipping to our

103 Early Angiers Broccoli

eastern markets. The most popular home or market sort. Matures its heads in 150 days.

Pkt. 10c; ½ oz. 40c; oz. 75c; ¼ lb. \$2.15; ½ lb. \$4.00; lb. \$7.50, postpaid

Brussels Sprouts

Known as Miniature Cabbage

CULTURE.—Excessive stem growth should be avoided by planting in good but not extra rich soil. Sow seed in April or June in the open ground, set plants in rows 3 feet apart, 18 inches apart in row. Break leaves from stem to aid formation of heads. A packet yields about 300 plants, an ounce 3,000 plants. Ready for use in about 125 days.

* 108 Danish Prize

Large, Solid Sprouts. 125 days
This large headed variety has proven to be a decided advance on anything yet offered; being of half-dwarf, sturdy growth and producing abundantly large, solid, dark green sprouts of fine quality in 125 days.

Pkt. 10c; oz. 25c; ¼ lb. 80c; ½ lb. \$1.20; lb. \$2.25; 2 lbs. \$4.10; 5 lbs. \$10.00; 10 lbs. \$19.00, postpaid

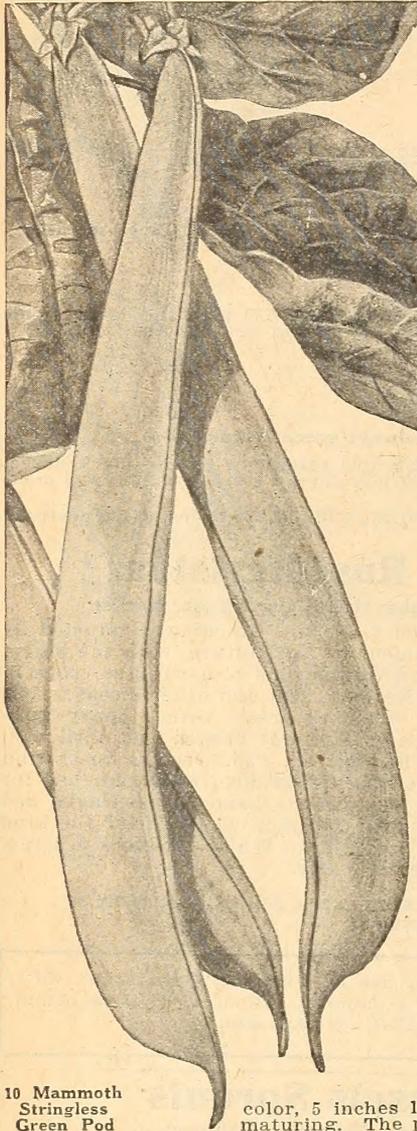

108 Brussels Sprouts

Green Pod Bush Beans

CULTURE—Succeed best in warm, sandy loam, enriched with well rotted stable or poultry manure. Must not be sown until the ground is warm and dry. Sow in drills 18 to 30 inches apart, 1 to 2 inches deep, placing the beans 2 to 3 inches apart in the drills; for a succession sow every 2 weeks

until September. A packet will sow about 25 feet of row; use 1 pound to 100 feet of drill, 60 pounds to the acre. Bush beans are ready for use in 40 to 65 days. Cultivate frequently but shallow and never when the foliage is wet.

* 27 Maule's Improved Butter Wax Bush Bean

The Best Yellow Podded Bean for the Home Garden. 40 days

This bean was first offered by us as "Nameless Wax" in 1906, later known as Maule's Wingold Wax, and now Maule's Improved Butter Wax; at present, considered one of the best and handsomest general purpose wax beans. Its pods are straighter, more uniform in color and size, more attractive than any other wax sort and fully as productive. Snap pods very uniform in size, long to medium, very straight, round medium yellow, extremely brittle, absolutely stringless, without fibre and of excellent quality. The yellow pods are ready for use in about 40 days and are borne equally above and below foliage, never colored or splashed. Seeds are white with a little brown around the eye.

In addition to the above this bean is one of the earliest wax sorts, and is rust-proof and free from disease attacks.

INOCULATE THIS SEED WITH MULFORD CULTURE

CULTURE—Succeed best in warm, sandy loam, enriched with well rotted stable or poultry manure. Must not be sown until the ground is warm and dry. Sow in drills 3 feet apart, placing the eye down, 18 to 24 inches apart in the drills; or in

hills 3 feet apart each way, allowing 1 or 2 plants to each hill. A packet will plant about 25 feet of row; use 1 pound to 100 feet, 25 to 30 pounds to the acre. Ready for use in 65 to 85 days.

* 60 Improved Fordhook Green Seeded Bush Lima

A True Bush Form of the Famous Fordhook Bush Lima Bean, Producing Larger and Plumper Pods with Thicker, More Meaty, Always Green Beans. 75 days

This decided improvement of Fordhook Bush Lima is so fixed that it will supersede that sort either for the home garden or market. Its strong, erect, true bush-form plant produces a thicker growth of dark green foliage, protecting the blossoms and pods from direct sun. The larger and plumper pods are produced in clusters of from five to eight. Each pod contains four to five thicker, more meaty, and plumper, always green beans. Improved Fordhook Bush Lima yields a very heavy crop in about 75 days, just as early as the original stock.

21 Robust Pea Bean

The Standard Sort for Winter Use. 60 days

This improved strain of white field bean, which was introduced by the Michigan Agricultural College, is such an improvement over the old standard sorts that it has taken the place of the Boston Pea and Burlingame Medium field beans. We recommend New Robust Pea Bean to our customers on account of its heavy yielding and disease-resistant qualities. The strong, upright plant carries the pods well above the ground, which keeps them from getting injured by wet weather before harvesting. Ripens its crop of medium size, dry, pearly white beans in about 60 days.

44 French Asparagus Pole Bean

46 Maule's Noxall 38 Golden Cluster

Maule's Table Beets

CULTURE—For earliest use and market, sow seed of any round sort under glass, in February or March, and transplant to open ground in March or April. Seed for main crop may be sown in the early spring as soon as ground can be worked. For table beets sow in drills 18 inches apart, and thin to stand 3 to 4 inches apart in the rows. A packet will sow a

row about 25 feet long; use 1 ounce to 100 feet; 5 to 6 lbs. per acre. The round and turnip shaped beets are best for spring and summer; the half long kinds for winter. Make successional plantings and cultivate freely. They are fit for use in 35 to 65 days. Beet tops are much used for greens, being cooked like spinach.

Maule's Blood Turnip Beet has given such excellent satisfaction that it still retains its position at the head of our list. It is very early, nearly as early as Egyptian, ready for the table in about 50 days. The color is a rich dark red, and shape is globular. It is free from side or fibrous roots, being always smooth. It is excellent for forcing for a main spring or summer crop, or for use in winter, as it is a good keeper. It always cuts and cooks a rich, dark blood red; is tender, sweet and crisp, and is in every way the standard sort for the market or home gardener. Maule's Blood Turnip Beet has long been regarded as the standard of excellence by more than 50,000 successful gardeners, who plant it year after year in preference to any other.

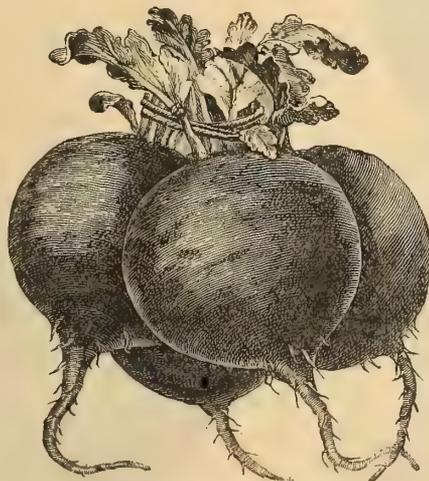

81 Maule's
Dark Red
Egyptian

* 81 Maule's Dark Red Egyptian

The Earliest of All Beets for Home or Market. 35 days

The Egyptian beet is one of the most popular varieties among market gardeners for forcing purposes. Justly or unjustly it is considered to be the earliest of all. It certainly will bear close planting in the valuable space under glass or in a warm garden in early spring. It is turnip shaped, and when young is crisp and tender. In color it is dark red. Ready for use in 35 days.

84 Detroit Dark Red Beet

* 84 Detroit Dark Red

Excellent for the Home Garden or Canning. 50 days

This early globe-shaped beet of excellent quality is especially esteemed on account of its dark red color, which extends entirely through the beet, and without the light colored rings seen in some varieties. The medium sized beets are smooth and handsome and are now being largely used for canning as well as for the home garden or market. It retains its good quality even after it gets large, and is an excellent variety on this account for fall use as well as for spring. Maturing in about 50 days.

74 Eclipse

* 74 Eclipse

Desirable for Home Gardens or Bunching. 45 days

We have a strain of extra purity and merit, particularly noted for earliness. It is indeed high praise to say that our Eclipse beet is almost as early as Crosby's Egyptian, for the latter has been long accepted as one of the earliest; Eclipse has ever been recognized as superior to Egyptian in table value. Our strain has small top and is smooth, fine grained and tender, with bright red color. Maturing in 45 days. For home gardens it is one of the best.

71 Maule's Market King

The Best Half Long Beet for Winter Keeping. 65 days
Market King is a quick grower and soon reaches maturity; one of the best main crop beets. An excellent winter keeper. The solidity, fineness and firmness of its bright red flesh make it one of the best keeping varieties. It is always a ready seller on the market stall, where a symmetrical shaped beet is wanted.

On the points of flavor and table quality, we would lay especial emphasis, for it is an ideal beet for household use. It can be used at all stages of growth, ready for use in about 65 days, and it is almost needless to say that a sweet and succulent half long blood beet like this is sure to become a favorite. An excellent Market Gardener's basket beet.

* 67 Maule's Alpha Beet

67 Maule's Alpha Beet

Best Extra Early Beet for Table or Market. 40 days
 Maule's Alpha beet is ready for market in 40 days from date of sowing. It is what we call a finely made-up beet, as shown in the illustration. It is turnip shaped; a little deeper than Crosby's Egyptian, with more body and more value. The flesh is of a dark crimson color, and is handsome in appearance. The top is small, which favors close planting. It has a rich, sweet flavor when cooked, and is tender and free from fibre or toughness. It is in fact, undoubtedly, **one of the best extra early table or market beets within our knowledge.** Maule's Alpha beet is worthy of universal trial by gardeners. It is good for the table and good for market, and will at once win public favor by reason of its earliness and its excellence.

Maule's Cabbage

CULTURE—Cabbage is a very gross feeder, and well repays heavy manuring and high culture. It succeeds best on well drained soil. The plants are started in frame or seed bed, and afterward transplanted. Seed for early cabbages may be started in autumn in a cold frame, or in early spring in a

hot bed. For main crop, summer and autumn cabbage, the seed should be sown in a rich border in the open air, in May or June. Sow shallow; a packet will produce about 250 plants, an ounce 3,000 plants; $\frac{1}{4}$ pound for an acre. Set plants $1\frac{1}{2}$ by 3 feet apart. Ready to use in 60 to 130 days.

* 111 Maule's First Early

A Splendid and Profitable Extra Early Flat-Headed Cabbage. 70 days

Maule's First Early is what is wanted for home or market. Its shape, habit of growth and general aspect are well shown in the illustration. It can safely be planted as close as Wakefield and is a sure header. It excels Wakefield and all other early cabbages in solidity of head; in fact, the head is as hard as a stone. It is a choice market sort on account of both shape and quality. It is a beautiful cabbage in appearance, being handsome in color and general uniformity.

No wonder the buyers of early cabbages select these attractive heads when displayed on the market stalls. Almost anybody would pick out one of these solid flat heads in preference to a round or pointed head variety.

Many of our customers have cleaned off their entire crop of Maule's First Early before they have started to cut Early Wakefield, or Early Flat Dutch.

111 Maule's First Early

* 110 Golden Acre

The Earliest Large Round Headed Sort. 70 days

Golden Acre has proven to be one of the most profitable home garden or market varieties for the early crop. Plants are dwarf, allowing close planting; the solid heads are as round as a ball, measuring, when fully matured, about 9 inches in diameter, the average weight of which is 5 pounds; hard as a cannon ball, solid and very uniform. The large size heads mature in 70 days and practically all at one time, and each is exactly like one another in size and form. Our selected stock of this grand cabbage is unexcelled—grown for us in Denmark by the originator.

112 Maule's Earliest Express

The Earliest of the Pointed Head Sorts. 70 days

We first introduced this cabbage in 1887. With First Early it holds the place as the earliest cabbage in cultivation, as it has produced fair sized, marketable pointed heads in 70 days. There are few loose leaves, and almost every plant forms a head.

Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 85c; $\frac{1}{2}$ lb. \$1.30; lb. \$2.50; 2 lbs. \$4.55; 5 lbs. \$11.00; 10 lbs. \$21.00, postpaid

* 118 Charleston Wakefield

An Improved and Larger Form of Jersey Wakefield. 90 days

The Charleston Wakefield is an improved and larger form of Maule's Prize Wakefield. It requires rather more time to reach maturity, but it yields fully twice the crop of the original Wakefield cabbage. It comes along in a close succession to the earliest cabbage crop producing its pointed heads in about 90 days. It is a strain which cannot be profitably over-looked by any gardener, whether it is intended for a private garden or to be sent to market.

Charleston Wakefield is a good keeper and may be planted as a second crop to mature in the autumn, if desired. It is a first rate shipper, and in great favor with everybody who knows it.

113 Maule's Prize Jersey Wakefield Cabbage

* 113 Maule's Prize Jersey Wakefield

Very Early, Solid, Pointed Head Cabbage. 75 days

Maule's Prize Jersey Wakefield is the earliest and finest strain of this variety. Grown from selected heads only, and is of the best quality. It has few outer leaves, and in compactness and regularity our strain cannot be surpassed. The thick stout leaves and uniform habit makes it the best sort for very early and close setting. It frequently matures large, hard conical-shaped heads of splendid eating quality within 75 days.

Maule's Three Desirable Cabbages

* 116 All Head Early

The All Year Round Large Flat Head Cabbage. 90 days

It has proven itself to be adaptable to a wide range of both soil and climate, and is well worthy of recognition as a standard American sort. It is a money maker for gardeners, and a very desirable sort in every garden. It is the earliest of large cabbages, being ready for the table or market in about 90 days. All Head Early in size of heads is one-third larger than Maule's First Early or Copenhagen market. The deep, flat heads are remarkably uniform in shape, size and color. Good quality and tenderness are its marked features.

* 132 Succession

Does Well in All Seasons; a Sure Cropper. 100 days

Nearly as early as Early Flat Dutch, but considerably larger in size and one of the largest and most desirable of the second early varieties. The heads are large, nearly round or somewhat flattened, extremely hard and solid, with finely ribbed leaves; the eating quality is not excelled by any other Cabbage. It is suited to all growing seasons, is a sure header under most adverse conditions, and keeps well even if planted very late. Remarkable for its ability to stand the hot sun and dry weather. Matures in 100 days.

116 All Head Early

* 133 Maule's Prize Drumhead

Large, Solid Flat Heads. A Good Keeper. 120 days

Sureness, in heading and regularity in growth have placed this variety high in the list, and we have no fear of using words of praise too high for its merits. It forms very large, hard, solid, flattened heads, uniform in shape and color, and of handsome appearance. It has a very short stem, and is a compact grower. Shortness of stem is so characteristic as to be associated with the very best strains of this cabbage, and the stock which we offer is thoroughbred in this and all other respects. This cabbage, like Prize Flat Dutch, has so long been an established standard that certain peculiarities have been bred into it, and have become so firmly fixed as to be necessary features of growth. It is as natural for this cabbage to form a head as to form leaves, and reports of 99 marketable heads from 100 plants are of frequent occurrence. Nobody will be disappointed in our strain of Short Stemmed Drumhead, for it far surpasses the old-fashioned strains of the same name, with heads of deeper and better shape maturing in 120 days. It is a standard sort for winter keeping or kraut making, and sells readily in the winter and spring markets.

* 130 Pe-Tsai

Chinese or Celery Cabbage. 60 days

Chinese cabbage is so grown, that it should be in garden. It is a dainty table vegetable either shredded as slaw, cooked as other cabbage or trimmed to be eaten as celery. It should be sown early for Spring use, or grown like late cabbage planted in July or August for Fall use. When bleached it is almost clear white, and is very crisp and tender. Grows very quickly, being ready to eat in 60 days. Full cultural directions are printed on each package.

130 Maule's Early Baby Ball Head Cabbage

* 120 Maule's Extremely Early Baby Ball Head

An Excellent Early, Round, Solid Head Sort for the Home Garden. 68 days

Its extreme earliness makes it a desirable sort for forcing—producing firm, well shaped, round heads in about 68 days from time of sowing of seed. Maule's Extremely Early Baby Ball Head Cabbage produces small, unusually solid white heads which are crisp and of delicious quality in about six weeks after setting out the plants. The peculiar advantage of this extremely early cabbage is that it requires very little space to grow, in comparison to other early varieties of cabbage; also its remarkable firmness and delicious taste. Originator's stock, grown in Denmark.

130 Pe-Tsai Chinese Cabbage

119 Copenhagen
Market
Cabbage

* 119 Copenhagen Market

The Best Early Round Headed Cabbage.
Stands Longest Without Bursting. 75 days

Copenhagen Market is certainly a valuable early maturing cabbage, producing round hard heads of the finest quality for the table or market in seventy-five days. It is the most popular early cabbage in the markets of Copenhagen, and has become very popular in America. Market gardeners here who tried it are strong in its praise on account of its extreme earliness and solid ten pound heads, with a small core and always of excellent quality, making it a good seller. The plants are short stemmed, producing heads almost on the ground. The light green colored leaves are medium in size, saucer shaped, and are always tightly folded; the plants may therefore be set closer than most other early varieties. It is a vigorous grower and yielder, as are all cabbages from Denmark, and an excellent keeper. A most excellent round headed sort for the home garden, as well as for the market gardener whose trade requires a large solid head early in the season. Our stock of Copenhagen Market comes to us direct from the originator in Copenhagen, Denmark, which we can highly recommend.

* 126 Maule's Midsummer

Controls the Garden or Market from June to October. The Best of all Cabbage for Warm Weather. 95 days

This intermediate sort matures in about 95 days, soon after All Head Early, producing much larger heads, of unsurpassed beauty and solidity. It has noteworthy compactness of growth, which permits close planting. Midsummer is a remarkably sure and uniform header, and is one of the most profitable market varieties. It's a truly fine summer cabbage in all respects, producing from June until October.

Maule's Midsummer cabbage has already met with wide appreciation and hearty endorsement, and we do not know of a sort of more commercial importance to market gardeners for warm weather culture.

127 Glory of Enkhousen

Round, Solid Heads of Superior Merit. 90 days

This desirable cabbage, Glory of Enkhousen, originated in Holland; in season it is medium early, maturing its heads in 90 days, with heads frequently weighing 8 to 10 pounds each. The large sized, ball shaped heads are very firm and solid, leaves being fine ribbed and exceedingly tender. It is a dwarf and compact grower, allowing close planting; in fact some of its enthusiastic admirers claim it will yield more tons per acre than any other variety on account of close planting.

Pkt. 10c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.45; lb. \$2.75; 2 lbs. \$5.00;

* 131 Maule's Genuine Surehead

The Surehead is the greatest and most profitable cabbage ever introduced, that has, for such a long term of years, maintained so wide a popularity. This is proven by the testimony of over 100,000 planters, in all sections of the country, representing all conditions of soil, elevation, climate and cultural treatment.

Maule's Surehead is a late variety with head as large as Maule's Prize Flat Dutch. Ready to cut in 110 days. The heads are firm and hard, elegant for kraut; the cabbage keeps well, is a splendid shipper, giving satisfaction everywhere, also an excellent home garden sort.

Pkt. 10c; oz. 30c; ¼ lb. 95c; ½ lb. \$1.60; lb. \$3.00; 2 lbs. \$5.50;
5 lbs. \$13.25; 10 lbs. \$25.25, postpaid

* 134 Maule's Prize Flat Dutch

Well Known and Widely Grown. 110 days

This cabbage is as widely grown as any other in the whole country. Continued care and critical selection have secured a perfectly true stock of seed. The heads of our Prize Flat Dutch are very large, heavy, solid, flat on top, and of a bluish green color. Our strain is a low growing variety with short stem and comparatively few outer leaves. The quality is fine and the flavor excellent, the heads being white when cut and the inside leaves crisp and tender. It is everywhere a favorite market or kraut variety. It matures slightly earlier than Prize Drumhead, producing heads in about 110 days. Prize Flat Dutch is comparatively free from a disposition to burst, and is one of the most reliable winter keepers.

Pkt. 10c; oz. 25c; ¼ lb. 85c; ½ lb. \$1.30; lb. \$2.50; 2 lbs. \$4.55;

* 117 Maule's Early Flat Dutch

Large, Solid, Flat Heads. 100 days

An excellent early maturing cabbage, producing large, solid heads of uniform shape, flattened on top. Similar to all Head Early. Fully developed heads frequently measure 10 to 12 inches across and weigh 12 to 15 pounds each. It also is fine grained and of dainty flavor. The large, flat heads are borne on short stems and are very solid. A sure cropper; practically every plant will form a good, solid head, which are ready to use in about 100 days. It succeeds everywhere, but seems particularly suited to the South, as it has strong heat resisting qualities. This variety has long been popular among growers, both for home or market.

Pkt. 10c; oz. 30c; ¼ lb. 95c; ½ lb. \$1.45; lb. \$2.65; 2 lbs. \$4.85;

138 Volga or Stonehead

A Splendid Drought Resister and a Good Keeper. 100 days

This grand cabbage is a great acquisition. In a field of several acres frequently not a single plant shows any variation from a true and valuable type, the large heads are of about equal size and shape, round as a ball, hard and solid, and stand a long time before bursting, producing heads in about 100 days. This sort is very desirable where large uniformly round heads with short stem and plants of compact growth are wanted.

All Head and Always Sure to Head. Excellent for Slaws or Sauer Kraut. 110 days

131 Maule's Genuine Surehead Cabbage

* 124 Danish Round Head Cabbage

Heaviest Yielding Strain, Often Producing 22 Tons Per Acre. Excellent for Making Slaws and Sauer Kraut. 110 days

125
Danish
Ball Head

In this strain we have very large, solid heads on short stems, produced in 110 days, having the same keeping quality as the original strain of Danish Ball Head, so widely known. It is 10 days to 2 weeks earlier and produces a larger yield than any of the so-called Danish cabbages. It is especially valuable for high, dry land, producing good sized heads where other strains would be too small. For shipping in the late fall or winter there is no finer cabbage than this strain. Danish Round Head is exceedingly hardy in resisting cold and stands dry weather well. Our stock comes direct from the originator in Denmark, and is so well bred that practically every plant will produce a good solid head.

Pkt. 10c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.45; 1b. \$2.75; 2 lbs. \$5.00; 5 lbs. \$12.15; 10 lbs. \$23.00, postpaid

* 123 Maule's Disease-Resistant Wisconsin Hollander

The "Yellows" or "Yellow Rot" Disease-Resistant Sort. 120 days

This new strain of Hollander cabbage we recommend for locations where cabbage plants are affected by the "yellows," causing fields to be abandoned. The disease-resistant qualities of this cabbage enable growers to produce a crop of medium size round or somewhat flattened heads of remarkable solidity and excellent keeping quality. Matures in about 120 days. The plants show considerable variation of types, resemble Hollander, but longer and more leafy and spreading.

Pkt. 10c; oz. 40c; ¼ lb. \$1.20; ½ lb. \$2.25; 1b. \$4.25; 2 lbs. \$7.80; 5 lbs. \$19.00; 10 lbs. \$36.00, postpaid

* 125 Danish Ball Head

Our Strain of this Seed is Simply Unsurpassed for Home Use, Market or for Making Sauer Kraut. 120 days

The wide and unailing popularity of Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions. The leading characteristics of Danish Ball Head cabbage are: First, that it is a sure header; second, that it is of unapproachable solidity and weight; third, that it is an extra good keeper; and fourth, that it is a good seller.

Danish Ball Head cabbage produces its crop in about 120 days. It is sure to head, the heads being round, hard and extremely heavy, though not extra large. It can be grown in close quarters, on account of its compact habit. As to its keeping qualities, it comes out of the pit in March or April as fresh as when put in, and with no waste. It is popular in the markets of all the large cities. Our seed of this popular cabbage comes to us direct from the best growers in Denmark.

Pkt. 10c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.45; 1b. \$2.75; 2 lbs. \$5.00; 5 lbs. \$12.15; 10 lbs. \$23.00, postpaid

THE
HOUSER

* 135 The Houser

The Latest Cabbage of Them All. 130 days

This excellent cabbage will average about 12 pounds at maturity, and the heads are uniformly handsome. The shape is round and deep, as indicated, and when a head cracks or bursts it is always at the stem end, which does not destroy its use for market.

In quality the Houser cabbage equals the best, being very free from the coarse ribs found in most late sorts. In fact, we would say that the Houser cabbage is very well bred. It is a strong, vigorous grower, with ability to withstand drought better than most varieties. Matures in about 130 days.

In respect to its keeping qualities in winter storage, it is perfect.

Pkt. 15c; oz. 50c; ¼ lb. \$1.40; ½ lb. \$2.65; 1b. \$5.00; 2 lbs. \$9.20; 5 lbs. \$22.25; 10 lbs. \$42.25, postpaid

143 Mammoth Red Rock

The Best, Largest Heading Red Cabbage. 120 days

The hardest and largest heading red cabbage. Produces heads in 120 days, round, very solid and of a deep red color, often weighing 12 pounds each. Used principally for pickling. A sure cropper.

Pkt. 10c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.45; 1b. \$2.75; 2 lbs. \$5.00; 5 lbs. \$12.15; 10 lbs. \$23.00, postpaid

141 Improved Drumhead Savoy Cabbage

140 Red Danish Round Head

Round, Solid, Dark Red Heads. 110 days

This is the newest and most superior variety of red cabbage. It originated in Denmark and is considered one of the best strains introduced. The plants are strong and compact in growth, producing dark red, round, solid heads of medium size, equally as hard and handsome in appearance as our famous Danish Ball Head. The red color extends to the centre of each head, making it a valuable sort for the home garden, market or pickling. Its beautiful solid heads are ready for the table in 110 days. Originator's stock.

Pkt. 10c; oz. 30c; ¼ lb. 95c; ½ lb. \$1.60; 1b. \$3.00; 2 lbs. \$5.50; 5 lbs. \$13.25; 10 lbs. \$25.25, postpaid

* 141 Improved Drumhead Savoy

The Best Crumpled Leaf Cabbage. 110 days

The Savoy cabbages are noted for their fine and delicate flavor. The leaves are wrinkled or densely crumpled. Matures fine large heads in 110 days. A good winter keeper. Excellent home or market sort.

Pkt. 10c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.45; 1b. \$2.75; 2 lbs. \$5.00; 5 lbs. \$12.15; 10 lbs. \$23.00, postpaid

Maule's Cauliflower

CULTURE—A gross feeder, and well repays heavy manuring and high culture. It succeeds best on well drained soil. Start plants in frame or seed bed, and transplant. Seed for early cauliflower may be started in Autumn in a cold frame, or in early Spring in a hot bed. For main crop, Summer and

Autumn, the seed should be sown in May or June. A packet will produce about 150 plants, an ounce about 3000 plants; ¼ pound for an acre. Set the plants 2 to 3 feet apart each way. Ready for use in 90 to 130 days.

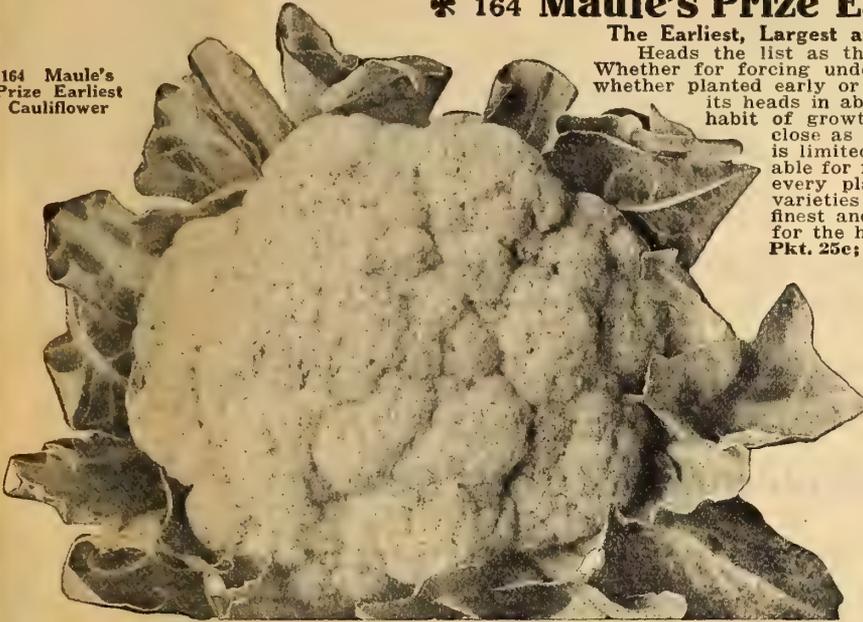

* 164 Maule's Prize Earliest Cauliflower

The Earliest, Largest and Surest White Header Grown. 90 days

Heads the list as the earliest, finest and handsomest cauliflower. Whether for forcing under glass or growing in the open ground, and whether planted early or late, it is the surest header of all, maturing its heads in about 90 days. It is very dwarf and compact in habit of growth, like the Snowball, and can be planted as close as 18 inches each way for forcing or where space is limited. Maule's Prize Earliest is particularly desirable for forcing under glass, while in our open air trials every plant has produced a head, excelling all other varieties in earliness, size and quality; undoubtedly the finest and most popular early cauliflower grown, either for the home garden or market.

Pkt. 25c; ¼ oz. \$1.00; ½ oz. \$1.65; oz. \$2.80; ¼ lb. \$8.00; ½ lb. \$15.00; lb. \$28.00, postpaid

164 Maule's Prize Earliest Cauliflower

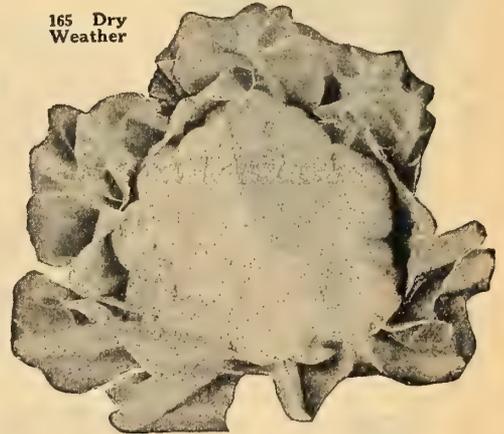

166 Maule's Always Heads

The Popular and Perfect Header. 100 days

The name well illustrates the strongest characteristic of this Cauliflower, that in season and out of season it can always be depended upon to make a head. Produces solid pure white heads in 100 days. It is an absolutely unsurpassed strain. Excellent home garden or market sort.

Pkt. 15c; ¼ oz. 85c; ½ oz. \$1.50; oz. \$2.75; ¼ lb. \$7.75; ½ lb. \$14.50; lb. \$27.50, postpaid

165 Dry Weather

* 165 Dry Weather Cauliflower

Reaches Perfection When Ordinary Sorts Fail. 105 days

This desirable strain originated in Denmark, but has been fully tested in America with the most favorable results. It produces a large, solid, pure white head, maturing in about 105 days, a little later than Maule's Prize Earliest. It is in all respects a first-class Cauliflower, but is especially and peculiarly adapted to dry situations and to resisting the effects of drought. It will also do well in moist or wet seasons, making heads equal to any. Excellent home or market sort.

Pkt. 20c; ¼ oz. \$1.00; ½ oz. \$1.65; oz. \$2.80; ¼ lb. \$8.00; ½ lb. \$15.00; lb. \$28.00, postpaid

* 168 Early Snowball

Large Solid White Heads. A Sure Cropper. 95 days

This standard variety is known everywhere, either in the home garden or with the market gardeners. Produces large solid white heads when conditions are ordinarily favorable in about 95 days. Averages about 9 inches and often attains a size of 12 inches in diameter.

Being one of the earliest strains of cauliflower it becomes one of the most popular sorts, either for forcing under glass during winter and spring, or for planting in the open ground. The plants are of compact habit, which enables close planting.

Pkt. 15c; ¼ oz. 85c; ½ oz. \$1.50; oz. \$2.75; ¼ lb. \$7.75; ½ lb. \$14.50; lb. \$27.50, postpaid

Garden Carrots

CULTURE—Sow in drills in early spring until July. Cover $\frac{1}{2}$ to 1 inch deep, and press soil about seed; afterward thin plants to 2 to 6 inches. Make rows 12 to 30 inches apart. Use a packet to 60 feet of drill, an ounce to 400 feet, 2 to 3 pounds to the acre. Ready to use in 45 to 75 days.

* 152 Maule's Danvers Half Long

The Popular Carrot for the Home Garden or Market. 70 days

This variety is well adapted to all soils and sections, and some years it leads our whole list as the best seller. It is half long in shape, almost cylindrical, somewhat stump rooted, and of rich, dark orange color. We claim that it will yield greater bulk and weight for a given length of root than any other carrot now grown. Over 40 tons per acre of Maule's Danvers have been grown, and a yield of 25 to 30 tons per acre is not uncommon. Matures its crop of beautiful shaped roots in 70 days. Grown extensively by market gardeners for bunching and makes a handsome appearance on the market stalls; of the finest quality and one of the most popular sorts for home use.

149 Nantes Half Long

Carrots for Stock Feeding

Carrots will pay you well if sown for a feeding crop for cows, horses or sheep.

CULTURE—Sow any time before July 1, half an inch below the surface, in rows 24 to 30 inches apart. Thin to 6 inches the row. Sow a packet to 60 feet of drill, an ounce to 400 feet, two pounds to the acre. Ready to use in 80 to 90 days.

* 156 Long Lemon Stump Rooted

Also Known as Lobberichs Agricultural. 80 days
Considered the best yellow carrot ever offered to American farmers. It is of a rich yellow color, stump-rooted, and grows to a large size. Matures in 80 days.
Pkt. 10c; oz. 15c; ¼ lb. 35c; ½ lb. 55c; lb. \$1.00; 2 lbs. \$1.80; 5 lbs. \$4.25; 10 lbs. \$7.75, postpaid

* 158 Improved Short White A Heavy Cropper, Easy to Harvest. 85 days

One of the very best. Roots are half long, 7 to 9 inches in length, smooth, very heavy at the shoulder but tapering regularly to the point, maturing its crop of roots in about 85 days. The color is creamy white with light green crown. The flesh is white, solid, crisp and of excellent quality for stock feeding.
Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 35c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.50; 10 lbs. \$4.75, postpaid

162 Large Yellow Belgian Enormous Yields. 90 days

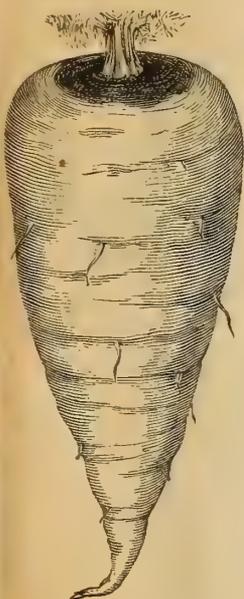

This is the giant among carrots and produces an immense quantity of roots in 90 days. The skin is of a pale orange color. The flesh is light orange. The roots are produced entirely under ground. Many farmers prefer the orange fleshed carrots to those with white flesh and they are said to be most nutritious.
Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 35c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.50; 10 lbs. \$4.75, postpaid

157 Mastodon Highly Relished by Stock. 85 days

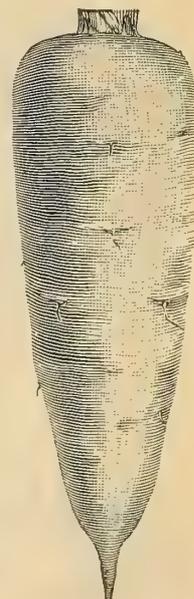

This carrot is extremely heavy at the shoulder, producing a short, heavy root, suited for shallow soil, and is fit to pull in 85 days; an enormous cropper. The crown is light green in color, but below ground the root is pure white, both skin and flesh. Root smooth, flesh rich and solid; best for stock feeding.
Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 35c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.50; 10 lbs. \$4.75, postpaid

161 Large White Belgian A Great Producer. 90 days

Our strain of this variety forms its roots entirely under ground. The roots will average 2 inches in diameter at the shoulder and a foot or more in length. The diameter is almost even throughout the entire length, the roots tapering gradually toward the base. Flesh and skin pure white, tinged with green on the upper portion, near the shoulder of the root. It does best in rich, deep soils.
Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 35c; lb. 65c; 2 lbs. \$1.10; 5 lbs. \$2.50; 10 lbs. \$4.75, postpaid

Maule's Celery

CULTURE—Celery seed is slow to germinate, and ample time must be given. Sow thinly in early spring and cover lightly. Keep constantly moist. Count on about 400 plants to a packet of seed, about 7,500 plants per ounce or quarter pound per acre. When the seedling plants are 3 inches high they should be clipped at the top, to favor stocky growth, or else transplanted. Celery is mostly grown under flat culture, without

trenches, in rows 4 feet apart, 6 inches apart in row. For home use celery is often grown in double rows, 10 inches apart, and plants 6 inches apart in each row, allowing 4 feet of space before setting out another double row. This will permit soil for banking for winter storage without lifting. Ready for use in 110 to 140 days.

* 176 Golden Plume or Wonderful

Blight Resistant and Free from Strings or Hollow Stalks. 110 days

A new type of the famous Golden Self-Blanching Celery. The plants are semi-dwarf with thicker stalks, very full heart and wider leaves, bleaches to a beautiful golden yellow color, ready for the table or market in 110 days. Its attractive appearance, superior quality, fine nutty flavor and resistance to attacks of blight and rust make it a very profitable variety for the market gardener.

Pkt. 20c; ½ oz. 70c; oz. \$1.20; ¼ lb. \$3.60; ½ lb. \$6.60; lb. \$12.00; 2 lbs. \$22.30; 5 lbs. \$54.00, postpaid

* 189 Maule's American Yellow

The Favorite Self-Blanching Sort for Home and Market. 110 days

Maule's American Yellow Celery is an early, self-blanching sort very similar in many ways to XX French grown Golden Self-Blanching, except that it grows a larger stalk, with the additional advantage that it fills a standard celery crate more evenly, maturing its beautiful golden yellow stalk in 110 days.

Pkt. 10c; ½ oz. 40c; oz. 65c; ¼ lb. \$1.85; ½ lb. \$3.50; lb. \$6.50; 2 lbs. \$12.00; 5 lbs. \$29.00; 10 lbs. \$55.00, postpaid

* 181 Perfected White Plume

The Most Delicious Celery in Cultivation. 120 days

This magnificent celery is a truly beautiful type. Not only does the stem whiten, but the leaf itself, especially every inner leaf, assumes the attractive white color. This makes the White Plume celery one of the most showy ornaments that can be put upon the Thanksgiving or Christmas dinner table. As to succulence, crispness and quality, the Perfected White Plume is all that can be desired. Fit to eat in 120 days. It is easily and quickly blanched.

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. 95c; ½ lb. \$1.60; lb. \$2.85; 2 lbs. \$5.20; 5 lbs. \$12.60; 10 lbs. \$23.80, postpaid

177 Emperor

The Largest Hearted and Best Nut Flavored Celery. 135 days

A well known true dwarf type with very large heart, solid and finest nut flavored. It is a true dwarf sort and, therefore, much easier to blanch than the taller growing varieties. Ready for the market or table in 135 days. The plants grow 15 to 18 inches in height. The stalks are smooth and very thick, the heart tinged with yellow, crisp and of decidedly nutty flavor. An excellent late keeper.

Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$1.75; ½ lb. \$3.25; lb. \$6.00; 2 lbs. \$11.00; 5 lbs. \$26.75; 10 lbs. \$50.55, postpaid

180 Columbia

Valuable for Fall or Early Winter Use. 115 days

This is a valuable celery to follow Golden Self-Blanching. Stored at the same time, it will be ready just as soon as the Golden Self-Blanching is gone. The stalks are broad and thick, almost round, solid and of the highest quality, and very attractive in appearance. The foliage is of a distinct light shade of green with a tinge of yellow. The plant is of medium height which matures in 115 days.

Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c; ½ lb. \$1.20; lb. \$2.25; 2 lbs. \$4.10; 5 lbs. \$10.00; 10 lbs. \$19.00, postpaid

182 Giant Pascal or Winter King

The Largest Ribbed Celery. 140 days

This celery has the sweet, nutty flavor of Golden Self-Blanching, of which it is an offspring. The stalks are about two feet high; thick, solid and stringless, and as brittle as glass. Matures in 140 days. It is an elegant winter keeper for home or market.

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. 90c; ½ lb. \$1.45; lb. \$2.75; 2 lbs. \$5.00; 5 lbs. \$12.15; 10 lbs. \$23.00, postpaid

185 Winter Queen Best Winter Sort. A Money Maker. 140 days

Probably the most desirable winter keeping celery. It is short, stout, thick and heavy, with double the amount of heart of any other celery, a habit of growth which gives it truly remarkable value. The flavor is sweet, nutty and delicious, leaving nothing to be desired. It bunches up handsomely. The leaves are light green, and blanch to a cream white. Matures its crop in 140 days. It is a money maker for the market gardener.

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. 80c; ½ lb. \$1.20; lb. \$2.25; 2 lbs. \$4.10; 5 lbs. \$10.00; 10 lbs. \$19.00, postpaid

188 Celeriac Or Turnip-Rooted Celery 120 days.

Culture is the same as celery; as the roots are the edible portion, it requires no hilling. The large roots are smooth, without any side roots, globular in shape. Flesh is pure white, tender and of excellent flavor and quality. Celeriac deserves to be grown much more than it is, as the roots are used for flavoring soups and salads, or are boiled like turnips, having the pleasant celery taste. Fit for the table in 120 days.

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. 80c; ½ lb. \$1.20; lb. \$2.25; 2 lbs. \$4.10; 5 lbs. \$10.00; 10 lbs. \$19.00, postpaid

175 Maule's Golden Self-Blanching Celery

XX Selected French Grown Original Dwarf Strain. 110 days

175 Maule's Golden Self-Blanching Celery

Our XX Selected French Grown Golden Self-Blanching celery is absolutely the best strain of this variety that we know. It is as true to type as any variety on the market. In quality it ranks with the highest. It is the favorite sort with both the market gardener and the amateur.

It is dwarf to half dwarf, growing 18 to 20 inches in height, wonderfully stocky, very heavy, perfectly solid, of delicate flavor and a very good keeper, ready for the table or market in 110 days. Added to these points is its great distinctive feature of being literally self-blanching.

All the largest and most experienced celery growers plant Maule's Golden Self-Blanching XX Selected French Grown seed. The top notch prices which they receive from their commission merchant produces an enormous profit annually.

Maule's Golden Self-Blanching XX Selected French Grown produces a bumper crop of excellent celery which stands shipping better than most other sorts, and brings the highest market prices. In the home garden the golden yellow stalks, which are crisp, and nutty in flavor, keep in good condition until Christmas or New Year.

We have had this seed grown for us in France by the same grower for years, so we know our stock is right.

MATURITY DATES

At the heading of all VEGETABLE SEED descriptions we are giving the maturity dates, starting from day of sowing the seed, thus (50 days). This will tell you when you may expect vegetables ready for the table; of course the weather conditions must be favorable for producing the crops.

Maule's Sweet or Sugar Corn

CULTURE—Plant when danger of frost is over, in drills 2x3 feet or 3x4 feet apart, about an inch deep and the seed 8 inches apart in the rows, or 4 seeds may be dropped in hills 3 to 4 feet each way, allowing 2 or 3 plants to remain in a hill. Make successional plantings until July 10th to insure

plenty of corn during the summer, and to have enough to dry or can for winter use. A packet will plant about 100 feet of drill, half pound for 200 hills; 12½ pounds per acre. Ready to eat in 55 to 90 days.

* 214 Maule's First of All

Extra Early, Large Eared Sort. 55 days

Matures in about 55 days, and we can confidently recommend it. It produces larger ears and more to the stalk than any other corn listed, and will prove a boon to gardeners who desire to be first in the market. It is one of the earliest sugar corns for the home garden, and in the market brings double the price that other corns command later.

217 Burpee's Sunnybrook

Luscious Golden Yellow Corn. 65 days

The ears of Burpee's Sunnybrook are of attractive appearance and of handy size for corn on the cob. The kernels are a bright golden yellow. They are broad and deep, and therefore extremely meaty. The rows and kernels are set closely together around a small cob. Of a luscious sweet and buttery flavor, greatly resembling that of Golden Bantam. The thick and tightly folded husk is an important feature with the variety because the corn ear worm seems to find it difficult to work its way into the ears.

* 205 Maule's Colossal Early Sugar Corn

For the Home Garden or Market. 70 days

The Finest Large Eared Sugar Corn in Existence

The first real rival of the Shoe Peg or Country Gentleman, as large as Stowell's Evergreen, and of delicious flavor.

Frequently matures fine large ears ten weeks from planting

Maule's Colossal has four principal points that especially recommend it:

First—Earliness. It has matured a crop in 60 to 65 days under extraordinary circumstances, but can generally be depended upon to produce ears of marketable size within 70 days.

Second—Flavor. It is the most delicious sugary corn you have ever eaten.

Third—Size. It is undoubtedly the largest eared early sugar corn in existence, as the ears average from 7 to 9 inches in length, and frequently 2½ to 3 inches in diameter, with 12 to 14 rows of large sweet kernels that fairly melt in your mouth.

Two or three ears are generally found on every stalk; it grows from 6 to 7 feet tall, which furnishes a most desirable fodder.

Fourth—A Money Maker. Every market gardener should grow Maule's Colossal Early sugar corn. It will prove profitable, as it is a money maker.

This is also a desirable variety for the home garden, as the quality of this corn is extra fine, being tender, sweet and delicious.

Pkt. 15c; ½ lb. 30c; lb. 50c; 2 lbs. 90c; 5 lbs. \$2.00; 10 lbs. \$3.65, postpaid

* 213 Barden's Wonder Bantam Sweet Corn

Ears Larger Than Golden Bantam. Just as Early and Sweet. 60 days

A new yellow grain variety of the same type, season and quality as Golden Bantam. Going one better by having larger ears produced higher up on the stalks. The stalks grow from 5 to 6 feet in height and have ears 8 to 10 inches in length filled with 8 rows of rich golden yellow kernels. It is a variety that will appeal to the critical market or home gardener as well as the canner who has been looking for a Bantam Corn that will produce more tonnage per acre and yet have the sugar sweet Bantam quality. All growers of corn should give Barden's Wonder Bantam a trial this season.

* 206 Maule's Ideal Early Corn

Do you want delicious corn on your table the 4th of July?

If so, plant this extremely hardy, early maturing, large eared sort. 55 days

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All sugar corns, considerably larger, and, best of all, contains a sweetness equal to most true sugar varieties.

It has the power of germination under conditions where all others have failed, and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high; no small item to a gardener; and as a proof of its quality and sweetness, we have a continuous call for "Ideal" from our customers year after year. In earliness, any one growing this pearly white corn will have the crop marketed and the money in his pocket before any of the early sugar corns are ready. Matures in 55 days. No gardener should fail to plant Maule's Ideal Early.

222 Maule's Lead All Evergreen

Maule's Cucumbers

CULTURE—Flourish best in a rich, warm, sandy loam. Sow when danger of frost is over, in hills 4 or 5 feet each way. As the young plant has many enemies sow thickly half an inch deep, and thin out finally to three or four plants to the hill. For pickles plant during June and July. Use a packet

of seed to 15 hills; an ounce to 75 hills; two to three pounds to the acre. Ready to use in 50 to 80 days. Gather cucumbers by cutting, not tearing. Leave none to ripen on the vines if you want a full crop.

* 244 Maule's Extra Early First for the Table, Market and Pickling. 55 days

This widely popular cucumber is as early as Green Cluster. Although early, the fruits are of fine quality and the color an attractive dark green. When suitable for pickling, the cucumbers are straight, square ended and very firm. When ready for slicing they are 6 to 7 inches long, crisp and of a most delicious flavor. The vines are of extra vigorous growth and produce an abundance of fruits, which are fit for the table or market in 55 days.

Its extreme earliness is, however, its greatest recommendation, making it invaluable. Its earliness and its very high quality make it a good variety for both home and market gardens, or for planting in June or July for late pickles.

* 254 Maule's Earliest Black Diamond

The Earliest of the White Spine Type. It "Stays Green." 50 days

Maule's Earliest Black Diamond is the cucumber all growers are looking for. It is adapted to all sections and soils. We especially recommend it to all growers that grow cucumbers either in small or large quantities, for the home garden, market or long distance shipping. The fruit grows 7 to 8 inches in length, cylindrical in shape, smooth and handsome. The color is a dark green from end to end, with little white rays at the blossom end. Maule's Earliest Black Diamond retains this dark green color longer than any kind we know of. On this account it will always command the highest market price. The flesh is white, firm, crisp, and of the very best quality for slicing. The vine makes a vigorous growth and is an enormous yielder of dark, always green, cucumbers maturing in about 50 days.

Pkt. 10c; oz. 20c; ¼ lb. 45c; ½ lb. 70c; lb. \$1.25; 2 lbs. \$2.25; 5 lbs. \$5.25; 10 lbs. \$9.75, postpaid

* 246 Davis Perfect Cucumber

Davis Perfect Planted Outdoors Will Equal in Flavor and Resemble the High Priced Hot House Forcing Sorts. 60 days

The Davis Perfect has become the most popular cucumber. It is ideal for shape, and has the handsomest dark green color of all cucumbers. Ready to pick in 60 days. It is of the most perfect size; just what is wanted either for the table or market. Its eating qualities surpass any other cucumber, and is almost seedless one-third of its length from the stem end, and the seeds when it is in slicing condition are so small and tender that they are unnoticed. The vines are enormously productive, in fact, beats anything we have ever tried.

Davis Perfect does not change its dark, rich color when grown outdoors; in fact, it resembles a hothouse cucumber so closely that dealers cannot tell the difference, and are willing to pay as much for it as the hothouse production. We believe this is the greatest cucumber ever introduced, and it is bound to become popular everywhere when it is known. It will be a big money maker for anyone engaged in growing cucumbers in the open ground.

Maule's Watermelons

CULTURE—Watermelons do best on light, well drained soils, but there are varieties adapted to heavy loams. The hills should be 3 feet apart each way, with some well rotted manure in each hill, thoroughly incorporated with the soil. Plant the seed as soon as the weather is really warm and

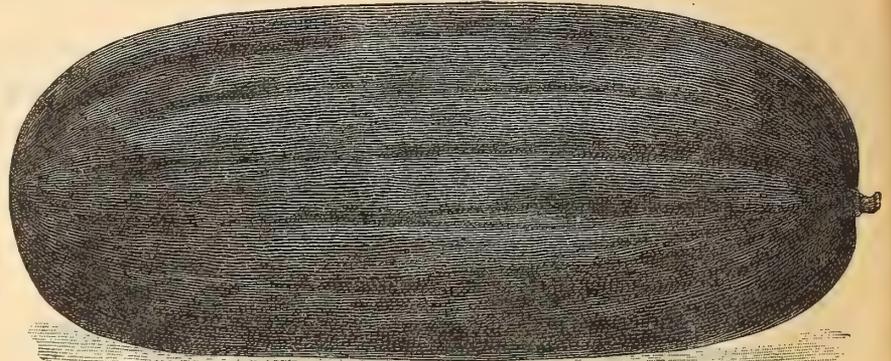

settled. A packet will plant about 10 hills, an ounce about 30 hills; 3 or 4 pounds of seed to the acre. Allow two or three plants to remain in each hill. Watermelons are ready to use in 75 to 100 days. Citron Melons are ready in about 100 days.

413 Halbert Honey Watermelon

Maule's Onion Seeds

CULTURE—Onions do best on a rich loam, previously cultivated for two years. The land should be highly fertilized with well-rotted manure, complete fertilizers, etc. Fresh stable manure has a tendency to produce soft onions. For dry (fall) onions a packet will sow about 50 feet of drill, an ounce about 300 feet, 4 to 5 lbs. of seed per acre. Sow in drills 12 to 18 inches apart as early in spring as possible and cover

one-half inch deep. When large enough thin to 3 inches apart. If sets are wanted, sow seed thickly and don't thin out; use 60 to 80 lbs. of seed per acre. Fine marketable size onions (according to variety planted) are easily produced the first year from early spring sown seed, maturing in from 65 to 120 days.
For Onion Sets, see page 61 in this Seed Book.

ORDER EARLY

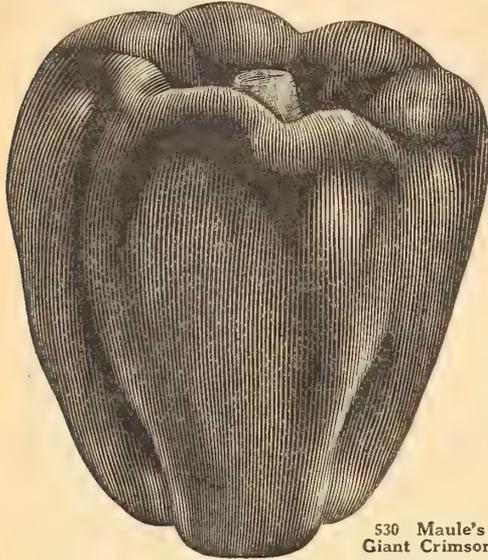

513 Maule's Prodigious

Maule's Peppers

The large fruited, mild varieties are largely used as salads, or stuffed with meat or other ingredients and baked or stewed, or sliced and fried as eggplants. The hot and pungent sorts are largely used for flavoring. The hot peppers may be strung on thread or the whole plant hung up to dry for winter use.

CULTURE—Sow the seed $\frac{1}{2}$ inch deep in hot bed, greenhouse or warm window, in March or April. After all danger of frost, set out in open ground. A warm, moist soil is best, with plenty rotted manure plowed under. Set in rows 2 to 3 feet apart and 18 inches apart in the rows. A packet will produce about 100 plants, an ounce about 1500 plants; $\frac{1}{4}$ pound to transplant for an acre. Ready for use in 110 to 145 days.

* 532 Maule's Chinese Giant

532 Chinese Giant Pepper

The Largest of All and Handsomest Mild Pepper. 140 days
Chinese Giant is certainly a wonder. The plants are of strong, stocky growth, of bushy, erect habit, growing 18 inches to 2 feet in height, with abundant foliage. The compact plants are very prolific, setting 3 to 4 extra large fruits at the base quite early in the season, which ripen while a second crop is setting on the branches. The fruit is quite square in appearance, while the flesh is thick and very mild, being entirely free from any fiery flavor. Without exception Chinese Giant is the finest and largest mild flavored pepper ever grown. Matures in 140 days.

* 635 Maule's Improved Hubbard

The Acknowledged Standard for Quality. 110 days

Maule's Improved Hubbard represents the perfection of the type. It is the choicest type of Hubbard grown. The flesh is of a rich yellow or orange color, and is very fine grained, solid, dry and sweet. The toughness of the dark olive green rind or shell makes the squash a good winter keeper.

Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.15; 2 lbs. \$2.05; 5 lbs. \$5.00; 10 lbs. \$9.10, postpaid

635 Improved Hubbard Squash

Maule's Tomatoes

Every garden should have an early as well as a main or general crop of tomatoes. Either for market or home use, the idea of growing early tomatoes is to get them as soon as possible and follow up with the main crop, which may be used in many ways and are especially desirable for canning. Do not plant in over-rich soil as it will cause an over-growth of foliage and few fruits.

CULTURE—Sow the seed in February or March in a hotbed,

greenhouse or in shallow boxes in the house in rows 4 to 6 inches apart and half an inch deep. When the plants are about 2 inches high transplant to 3-inch pots or into shallow boxes 4 inches apart each way. Transplant in the open ground after all danger of frost is past, 3 to 4 feet apart each way. Cultivate frequently. A packet will produce about 100 plants, an ounce about 3,500 plants, enough for an acre. Ready to pick in 85 to 120 days.

651 Maule's Earliest of All Tomato

* 655 New Red Head

An Exceptionally Fine, Large, Bright Red Sort. 100 days
(Bright Red.) This wonderful new bright red tomato produces exceptionally fine, large and smooth, nearly globe-shaped fruit, which is very meaty and contains few seeds. The thick, solid flesh is of luscious flavor. The vines are of medium growth and resistant to blight; extremely productive and bear continuously good size and shape, rich red colored tomatoes in 100 days. An excellent canning variety, or for the home garden it is one of the best, and is a money maker for the market gardener.

Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.15; ½ lb. \$2.10; lb. \$4.00; 2 lbs. \$7.35; 5 lbs. \$17.75; 10 lbs. \$33.75, postpaid

659 Greater Baltimore

Firm and Meaty. Excellent for the Table. 110 days

(Brilliant Red.) This grand, early variety produces large, bright red tomatoes in clusters in about 110 days. The vines are vigorous, compact and healthy growers; a heavy cropper of large, smooth, well formed tomatoes; deep from stem to blossom end. Very firm and meaty. Free from ridges, cracks and blight. For canning or the home garden the results have been far beyond expectations.

* 651 Maule's Earliest of All The Greatest of All Early Tomatoes. 85 days

Four Days to a Week Earlier Than Any Other Tomato

(Bright Red.) Maule's Earliest of All is the best extra early tomato in America for the home or market gardener. Nor is its extreme earliness its only virtue, for it is of large size, good color and delicious flavor. It does not crack and has no large core. Color is a bright red, a little irregular in shape, but not rough. Ready to pick in 85 days.

Pages of this Seed Book could be filled with statements and comments about the money value of this fine, early tomato. Maule's Earliest of All is all its name implies, namely: **the earliest tomato in existence**, notwithstanding the claims made for June Pink, Earliana, King of the Earlies, Wayahead, Chalk's Early Jewel, John Baer, etc.

Pkt. 15c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.40; ½ lb. \$2.65; lb. \$5.00; 2 lbs. \$9.20; 5 lbs. \$22.25; 10 lbs. \$42.25, postpaid

* 660 John Baer

Early, Smooth, Solid and Meaty Tomato. 95 days

(Bright Red.) This grand early tomato produced in 95 days, very large and attractive bright red colored fruit. The introducer has this to say: John Baer produces large, beautiful, solid tomatoes which ripen early right up to the stem and is an enormous cropper, and when dead ripe will not burst. Unexcelled for early home or market use.

669 New Marglobe Tomato

Start your early tomato plants indoors, allowing 4 to 6 weeks to produce plants for setting out

* 657 Maule's Imperial

The Truckers Favorite Purple Fruited Sort. 100 days
(Purplish Pink.) Maule's Imperial is unquestionably the best purple fruited tomato in the market today. Not quite as early as Maule's Earliest of All. The fruits are beautifully smooth, and in market this variety invariably commands the highest prices at all times and in all seasons.
Maule's Imperial, in color, is between pink-purple and glossy crimson. The flavor is of the best. It ripens evenly to the stem, and is highly productive, the yield under favorable field culture having reached 1½ bushels of ripe fruit per plant. It bears early, maturing in about 100 days, and produces fruit until frost. A desirable home garden or market tomato.
Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.15; ½ lb. \$2.10; lb. \$4.00; 2 lbs. \$7.35; 5 lbs. \$17.75; 10 lbs. \$33.75, postpaid

663 Chalk's Early Jewel

One of the Best Second Early Tomatoes. 95 days
(Bright Scarlet.) Within a week as early as Spark's Earliana, it is even a heavier cropper, with tomatoes of larger size and sweeter flavor, while its more robust growth makes it a sure cropper. Large, handsome fruits, very solid, deep through. Ripening right up to the stem without any cracks or green core. Ready to pick in 95 days. For the home garden or market, it is one of the best.
Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. \$1.30; ½ lb. \$2.35; lb. \$4.50; 2 lbs. \$8.25; 5 lbs. \$20.00; 10 lbs. \$38.00, postpaid

670 Redfield Beauty

Excellent for the Home Garden or for Shipping. 100 days
(Glossy Purple.) Redfield Beauty has done so well in all sections that it is a favorite everywhere. Produces a vigorous vine growth with long bearing qualities, heavily laden with large, glossy purple tomatoes, ready to eat or ship in 100 days, of perfect shape, solidity and toughness of skin, making it a valuable sort for market gardeners for long distance shipping or market, as the skin does not break easily. For the home garden it is just right for shape, size, color, earliness and bearing qualities, and is one of the most satisfactory tomatoes to grow for the table, or for slicing and canning.
Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.15; ½ lb. \$2.10; lb. \$4.00; 2 lbs. \$7.35; 5 lbs. \$17.75; 10 lbs. \$33.75, postpaid

674 Golden Queen

A Very Early, Large, Smooth, Yellow Tomato. 100 days
(Bright Yellow.) Early, large, bright golden yellow tomato. Sometimes with a slight blush of red. Size and shape like Matchless, except in color. Always smooth, and ripens in about 100 days. Quality excellent in all respects, either for slicing or preserving.
Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. \$1.40; ½ lb. \$2.60; lb. \$4.75; 2 lbs. \$8.75; 5 lbs. \$21.15, postpaid

* 675 Golden Ponderosa

Produces Yellow Tomatoes in Great Size and Profusion. 110 days
(Golden Yellow.) This grand large tomato equals its famous parent, the Crimson Ponderosa, in every respect but color. The vines are vigorous, luxuriant and healthy and bear a tremendous load of tomatoes, right up to frost. The fruit is very uniform in shape and size and contains but few seeds. It is the largest and heaviest of the yellow sorts, free from acid, sweet and luscious, with very heavy meat. Ripens first fruit in about 110 days and continues to bear until frost. Excellent for slicing or for making into preserves.
Pkt. 15c; ½ oz. 35c; oz. 65c; ¼ lb. \$1.85; ½ lb. \$3.50; lb. \$6.50, postpaid

* 652 Maule's Success Tomato

The Best All Around Red Sort. 110 days.
(Bright Red.) Maule's Success is smooth, well formed and extremely deep from stem to blossom, making it unusually heavy. It ripens evenly to the stem, and is without ridges or cracks; has great meatiness and few seeds. It is firm, without being hard. The vines are vigorous but compact. Maule's Success is the heaviest for its size of any variety; on account of its brilliant red color, depth and solidity, it is the handsomest main crop tomato we have ever seen. On the market stall its beautiful appearance and color make it sell ahead of all sorts, and its unusual solidity, few seeds and desirable form make it the most desirable canning variety known. Ready to pick in about 110 days.
Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.15; ½ lb. \$2.10; lb. \$4.00; 2 lbs. \$7.35; 5 lbs. \$17.75; 10 lbs. \$33.75, postpaid

668 Gulf State Market

A Blight Resistant, Pink Skin, Globe-shaped Tomato. 100 days
(Deep Purplish Pink.) This new globe-shape tomato was developed from Early Detroit and is as early as that variety. Matures in 100 days. The medium to large size fruits are almost true globe shape and are entirely free from cracks or blemishes about the blossom end. Flesh solid and meaty. Color deep purplish pink. A dependable long distance shipper. Also a very desirable sort for the home gardener.

678 Dwarf Champion

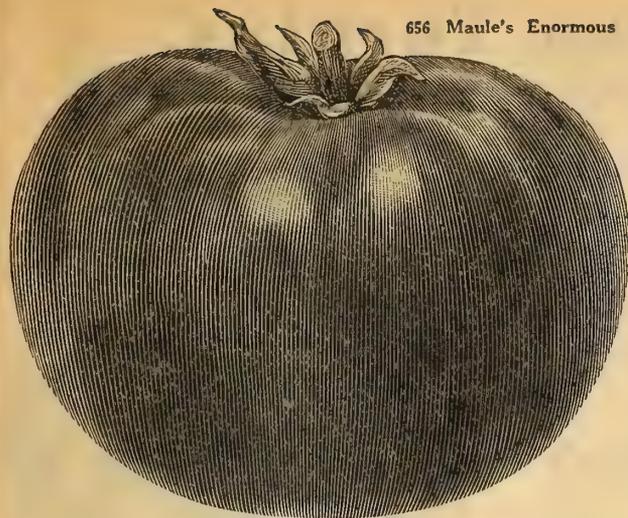

The Best Pink Tree Tomato. 100 days
(Purplish Pink.) The famous Dwarf Champion tomato owes its wide popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to its earliness; matures large size fruit in 100 days. In color it is a purplish pink.
Pkt. 10c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.40; ½ lb. \$2.65; lb. \$5.00; 2 lbs. \$9.20; 5 lbs. \$22.25, postpaid

* 682 Ponderosa

Nearly Seedless and as Solid as Beefsteak. 110 days
(Purple Crimson.) Although introduced many years ago, up to the present time no tomato has yet surpassed the genuine Ponderosa in size or delicious, meaty flavor. It is not only the largest but also the heaviest tomato grown. The color is a glowing purple crimson; shape quite regular considering its size, and it is considered by thousands of people the best table variety in existence for slicing, having but few seeds. Ripens in about 110 days, and bears well until very late. A good tomato for home use.
Pkt. 15c; ½ oz. 35c; oz. 65c; ¼ lb. \$1.85; ½ lb. \$3.50; lb. \$6.50, postpaid

682 Ponderosa Tomato

* 656 Maule's Enormous Tomato

The Largest Red. The Sweetest of All. 110 days

(Deep Red.) Maule's Enormous tomato, bred by Mr. Miesse, was first introduced to the public by us under the name "Eight to the Yard." Maule's Enormous, however, was not bred merely for large size. The name was selected from the fact that it seemed to apply better to this wonderful tomato than to any other. In comparative trials with other sorts, under ordinary conditions, Maule's Enormous has made a record for both quality and quantity, while the beauty of the fruit makes it an easy and quick seller in all markets. The fruit is remarkably solid and firm. Enormous is now universally recognized as a standard main crop red tomato, of great size and productive ability. Maturing in 110 days.

Pkt. 15c; ½ oz. 35c; oz. 65c; ¼ lb. \$1.85; ½ lb. \$3.50; lb. \$6.50; 2 lbs. \$12.00; 5 lbs. \$29.00; 10 lbs. \$55.00, postpaid

* 680 Maule's Columbia Wiltproof

A Wonderful Cropper. The Greatest Tomato. 110 days

(Bright Red.) Columbia is a very large, smooth tomato, well-formed and deep from stem to blossom. It is of a bright red color and ripens up to the stem; flesh is solid, with very few seeds. The wilt-resistant foliage is larger and much heavier than Matchless. It is a wonderful bearer, outyielding many of the best cropping sorts. Tomatoes run more uniform than any other variety, and it does not have as many small fruits in the latter part of the season, a fact that will be greatly appreciated by all growers. Ready to pick in 110 days. Splendid for market gardeners, home gardeners or canners wanting a strictly large, fancy tomato.

Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. \$1.30; ½ lb. \$2.35; lb. \$4.50; 2 lbs. \$8.25; 5 lbs. \$20.00; 10 lbs. \$38.00, postpaid

* 667 Cooper's Special or Self-Pruning

Distinct in Growth, Pink Fruited and Globe Shaped. 100 days (Purplish Pink.) A new tomato of recent introduction becoming very popular with Florida growers on account of being what they term a self-topper. The vines produce a limited number of side shoots close to the ground and branch but little on the upper part of the vines. The vines are shorter than any of the original tall vine sorts. The fruits are set in clusters of 4 to 5 fruits every 5 to 6 inches along the vines. They are perfectly smooth, firm fleshed and solid, of good size but not as large as Livingston's Globe, which it resembles. The color is a bright purplish pink. Matures in 100 days. A good long-distance shipper, also an excellent home or market gardener's sort. Does well in all sections, North or South.

Pkt. 15c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.40; ½ lb. \$2.65; lb. \$5.00; 2 lbs. \$9.20; 5 lbs. \$22.25; 10 lbs. \$42.25, postpaid

704 Japanese Turnip

A Large, Tender and Sweet Turnip.

70 days

This turnip is a large white variety, of great merit, and comes directly from Japan; in fact, the seed which we offer was actually grown in Japan, and was imported expressly for this season's sales. The shape of the turnip is between flat and globe. The color is pure white, both outside and inside, except that there is a pale tinting of green on top, near the leaves. As it is a large turnip it has correspondingly large and vigorous leaves. It is solid and meaty in flesh. As a heavy cropper and reliable winter keeper it cannot be excelled, and we are able to recommend it highly to all growers. It will be found adapted to table use as well as to stock. Maturing in 70 days.

Maule's Onion Sets

CULTURE—Onion sets should be planted as early in the spring as the ground can be worked. Set the onions in the ground lightly (do not cover) in shallow furrows, 12 to 18 inches apart and about 2 inches apart in the row. Young onions may be had in 5 weeks. By planting sets, onions can be produced for market or household use 4 to 6 weeks earlier than can be had from seed. Onions from sets are usually harvested in the locality of Philadelphia in July, which allows the sowing of another crop on the same ground the same season. A pound of onion sets will plant a row about 100 feet long, use 250 lbs. to 325 lbs. to an acre.

841 Improved Swedish Oats A Wonderful Stooler and Reliable Yields

The heaviest yielding white seeded branch oats for spring sowing, ranking first in weight, stiffness of straw and thin hulling qualities. The stiff straw which holds up unusually well grows from 4 to 5 feet tall with heads measuring from 8 to 11½ inches long and produces grain weighing from 36 to 40 pounds to the measured bushel. These oats are quite early, less liable to smut or rust than other sorts. Sow at the rate of 64 to 96 pounds to the acre.

851 Speltz or Emmer

Yields More than Wheat or Barley

It ripens early; the grain is intermediate between wheat and barley. The chaff adheres to the grain when threshed, and is fed in that condition to stock. It is adapted for milling purposes, as well as for feeding, making a grade somewhat similar to rye. The straw resembles wheat straw. It grows large crops—40 to 80 bushels per acre—on comparatively poor soil, and it is said to give full double the crop of barley. It resists drought successfully, and is adapted to Northern latitudes. Sow in the spring or in the fall at the rate of 80 pounds per acre.

Maule's Field Corns

CULTURE—Plant when weather has settled and ground has become warm, in hills 4 feet apart each way, allowing 2 or 3 plants to remain in a hill, or sow in drills 4 feet apart, dropping one seed each foot in the drill; use 14 pounds of seed

for an acre. For fodder or ensilage, sow thickly in drills, 3 to 4 feet apart, sowing 56 to 84 pounds per acre. With each variety, we give time of maturing under favorable weather conditions. All prices are subject to change without notice.

802 Maule's Droughtproof Yellow Dent Corn

Resists Drought and Scorching Heat Better Than Any Other Variety. 90 days

Droughtproof Yellow Dent produces handsome ears of good size and symmetrical shape with the largest grains and the smallest cob of any Yellow Dent corn. In fact, from 70 pounds of corn on the ear, 64 pounds of shelled corn and only 6 pounds of cobs were obtained, which cannot be equalled by any other corn in existence. Grains are deep wedge shaped and of the brightest color. Yield not excelled by any other early sort. Matures in 90 days.

We do not hesitate to say that, all points considered—its beautiful color, long yellow grains, large ears—taking all points combined, it is the finest corn ever introduced.

799 Maule's Earliest of All Dent

The earliest dent corn in cultivation. It will mature in New York, any of the New England States, also Wisconsin, Michigan and Canada. 75 days

This variety of Dent Corn we believe to be the heaviest yielder of any extreme early corn yet introduced.

It is a very hardy grower, and prolific yielder for so early a corn. The leafy stalks average 8 feet or more in height, often producing two nice ears measuring 8 to 10 inches in length, well filled with good sound kernels, of a dark red shade, tipped with pure white, making it a very handsome corn in appearance.

It matures in 75 days from date of planting and yields on an average of 100 bushels of corn per acre.

This new corn can be grown with success anywhere that Early Canada Flint Corn matures, as it is some 10 days earlier than Early Canada Flint Corn. We strongly recommend the planting of this dent corn in the northern climate or in any climate where a good dent corn is wanted.

815 Sugar Corn for Green Forage

Excellent for Dairy Stock. Ready to cut in 50 days

For forage purposes, it is the best of all corns both as green corn for ensilage or to be cut and used dry. Both the stalks and fodder contain large amounts of saccharine matter which is both fattening and relished by stock. It is sown in drills 2½ to 3 feet apart and requires 40 to 60 pounds of seed per acre. Ready to cut in 50 days.

802 Maule's Droughtproof Yellow Dent Corn

805 Maule's Earliest Yellow Dent Corn

The Earliest of All Yellow Dent Corn, Maturing in 80 to 85 Days
Will Mature Anywhere South of the Canadian Border

This exceptionally early yellow Dent Corn produces good size stalks averaging 7 to 10 feet in height, with large size ears, 8 to 10 inches long having an average of 16 rows of kernels on each cob which is red in color. The ears set up well on the stalk 4 to 5 feet high, often producing 2 fine ears on each stalk. The ears are easily broken from the stalk making them easy to husk. The kernels are of a beautiful Orange Yellow shade, unlike any other Yellow Corn. A very heavy corn and a wonderful sheller, maturing in 80 to 85 days.

809 Maule's Improved Mastodon Yellow Dent

Largest Eared Yellow Dent. 100 days

It is the largest eared early yellow dent corn; the ears measuring 9 to 12 inches in length, with 16 to 22 rows of grains. Out-yields any other variety ripening at the same time.

It makes a rapid, strong and rank growth, attaining a height of 9 to 10 feet, often producing 2 large ears to a stalk. The foliage is large, making fine fodder.

We consider Improved Mastodon the variety to plant where an early, large eared corn is wanted that will mature in 95 to 100 days under favorable growing conditions. It makes fine looking shelled corn, showing two shades, a golden yellow with a white cap.

807 Johnson County White Dent

Heaviest Cropping Corn. 120 days

The high breeding of this variety makes its growth more uniform. The beautiful large ears are cylindrical in shape up to within about 2 inches of the tip. Both kernel and cob are white. The tips of the ears are well filled, a large percentage being completely covered with grain. The kernels are uniform in size and very long and wedge-shaped; 13 to 24 rows on a cob. The ears will average about 10 inches in length and from 7½ to 8 inches in circumference. There is very little space between the rows and this variety yields a very high percentage of shelled corn. The stalk is good and thrifty, ranging in height from 10 to 12 feet. Matures in about 120 days.

812 Reid's Yellow Dent

Most Popular Yellow Corn. 110 days

For a number of years past Reid's Yellow Dent has been one of the most popular varieties of the Middle West, some people going so far as to say there is more of this corn planted than of all other sorts combined. It is a true dent corn, color a beautiful golden yellow, with one of the smallest cobs for size of ear of any yellow corn. Ears are frequently 9 to 11 inches long and from 7 to 8 inches in circumference. It is easily shelled and matures its crop under favorable conditions in about 110 days. It undoubtedly has taken more prizes at the Illinois State Fair and other great corn shows than any other variety.

890 Timothy

791 Alfalfa American Grown Certified

The Supreme Leader of All the Clovers

No crop ever grown has had such a conspicuous place in increasing the profit from agriculture as alfalfa. Its long fibrous roots working their way far down into the soil liberate, after the hay is cut, an immense volume of plant foods to be drawn on for years to come by future crops. It can be cut 3 to 5 times a year and produces from 3 to 7 tons of hay per acre. As a feed for cattle, swine, poultry or stock of any kind, owing to its large percentage of protein, it is unsurpassed. Can be grown successfully anywhere. Lime must be supplied or the plants will fall. Suggest using 1 to 2 tons of lime per acre before planting alfalfa seed. Sow from 15 to 25 pounds per acre in April or May or July and August.

888 Sudan Grass The Hay Maker and Drought Resister

Sudan is an annual grass and must be reseeded every year. The plant under favorable weather conditions grows to a height of 6 to 10 feet, but when broadcasted thickly it grows only 3 to 5 feet high. It frequently produces 20 or more stalks to a plant. The stems are unbranched, seldom larger than a lead pencil and are covered with an abundance of leaves. Is easily cured, making hay of excellent quality, which is readily eaten by all kinds of stock without injury to them. Sow seed by drilling or broadcasting, using 10 to 15 pounds per acre.

Lb. 35c; 2 lbs. 60c; 5 lbs. \$1.40; 10 lbs. \$2.65, postpaid

Sow Maule's Extra Lawn Grass Seed, offered on page 68, and your lawn will be the envy of your neighbors

Maule's Lawn Grass

891 Maule's Extra Lawn Grass Mixture

A Beautiful, Smooth, Low Growing Evergreen Grass for the Yard or Lawn

This mixture will insure a beautiful, compact, evergreen sod on any lawn where the essential requirements of grass culture have been complied with. Its component parts are the grasses peculiarly adapted to lawns and yards, including choice selected strains of Kentucky Blue, etc., along with the best known creeping or sod forming sorts. We have included a little white clover in the mixture, regarding it as essential. Full provision is made for a succession of growth, so that there shall be no break in the richness of the verdure from spring

until autumn, and experience proves that Maule's Extra Lawn Grass Mixture is now perfect. Nothing better can be purchased on the American market. Our friends will please note that this seed is sold 20 pounds per bushel. This is because we employ the choicest and heaviest strains of grass seed in making the mixture. For those that wish this mixture without white clover we can supply it at the same prices but in ordering please mention you want it without clover. Grass seed can be sown any time between April and September.

½ lb. 30c; 1 lb. 50c; 2 lbs. 95c; 5 lbs. \$2.25; 10 lbs. \$4.25, postpaid

Not prepaid, 15 lbs. \$5.25; 25 lbs. \$8.50; 50 lbs. \$16.50; 100 lbs. \$32.00; 250 lbs. \$75.00; 500 lbs. \$140.00

884 Quick Results Lawn Mixture

A Rapid Growing Velvety Green Grass

This mixture is for producing an immediate greensward that will be followed by a good, permanent sod. It is especially to be recommended for late spring seeding, without a nurse crop. For early seeding we would rather use Maule's Extra Lawn Grass Mixture, but after May 1st (in the latitude of Philadelphia) we would much prefer this one. It will make rapid growth, and will be ready to cut two weeks in advance of any other mixture which we offer; nor is it lacking in permanence.

½ lb. 30c; 1 lb. 50c; 2 lbs. 95c; 5 lbs. \$2.25; 10 lbs. \$4.25, postpaid

Not prepaid, 15 lbs. \$5.25; 25 lbs. \$8.50; 50 lbs. \$16.50; 100 lbs. \$32.00; 250 lbs. \$75.00; 500 lbs. \$140.00

886 Maule's Steep Slope Mixture

A Lasting Grass for Embankments and Terraces

This is for banks, terraces, steep or exposed slopes and bare spots in general; in fact, for any place, however dry, stony or barren. It will produce a sod that is absolutely proof against heat or drought, and that cannot be injured by cold. The grasses produce strong, spreading roots, thus preventing heavy rains from washing them out; will withstand exposure, thrives on shallow soils, and at the same time produces a rich, velvety green turf throughout the season.

½ lb. 30c; 1 lb. 55c; 2 lbs. \$1.00; 5 lbs. \$2.35; 10 lbs. \$4.50, postpaid

887 Maule's "Sunny South"

A Grass Mixture Especially Suited For Hot Climates

A special preparation that will resist extremes of heat and drought; this mixture has given very satisfactory results and by proper care and continued watering a beautiful lawn can be had in the Southern states, where grasses do not generally thrive during the summer months.

½ lb. 30c; 1 lb. 50c; 2 lbs. 95c; 5 lbs. \$2.25; 10 lbs. \$4.25, postpaid

Not prepaid, 15 lbs. \$5.25; 25 lbs. \$8.50; 50 lbs. \$16.50; 100 lbs. \$32.00; 250 lbs. \$75.00; 500 lbs. \$140.00

Quantity of Grass Seed to Sow

1 pound	will sow a plot	15 x 20 feet	300 sq. ft.
5 pounds	"	" " 40 x 50 "	2000 "
25 pounds	"	" ¼ acre 100 x 108 "	10800 "

If intended for renovating an old lawn, about half the above quantities are sufficient for the given spaces.

Maule's Three Permanent Pasture Mixtures

Best Adapted for Producing an Abundant Hay Crop or for Pasturage

It is true beyond all question that a mixture of grasses produces a better mowing field and subsequent permanent pasture than a mere combination of timothy and clovers. The former will last five times as long as the latter. Timothy "runs out" in a couple of years or so, while a good permanent pasture will last ten or even twenty years. This has been frequently and forcibly shown by experience. Our completed mixtures are sold in two parts, one containing grass seeds and the other clover seeds, to be sown separately, on account of their different weights. The grass seeds may be sown in spring or fall; the clover seeds preferably in the spring. In preparing the permanent pasture grass mixtures we employ mainly Kentucky Blue, Timothy,

English or Perennial Rye, Italian Rye, Red Top or Herd, Orchard, Meadow Fescue or English Blue, Canadian Blue and Crested Dogstall.

Clovers used in mixtures are Red, Alsike and White. A few of these components will disappear in a few years, but the others are absolutely permanent. We vary the proportions to suit the different soils.

Maule's Permanent Pasture Mixture for Light and Sandy Soils.—Use at the rate of 40 pounds per acre.

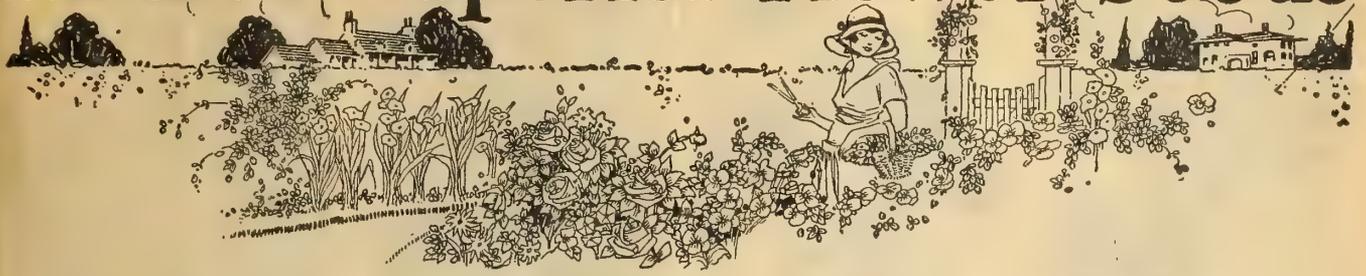

Maule's Permanent Pasture Mixture for Average Soils.—For general use, everywhere. Sow at the rate of 40 pounds per acre.

Maule's Permanent Pasture Mixture for Heavy Soils.—Use at the rate of 40 pounds per acre.

Any of the above PERMANENT PASTURE MIXTURES: Lb. 40c; 2 lbs. 75c; 5 lbs. \$1.75; 10 lbs. \$3.25, postpaid.

Maule's Superior Flower Seeds

The Best of the New Flowers Recently Introduced and all the old and well-tried favorites

More flowers, which include seeds, bulbs, roots and plants, are being planted every year. The increased demand each season has always exceeded our expectations, but last season far surpassed all previous years. Many thanks to our friends. Two reasons may be attributed to this large increase; the superior excellence of Maule's seeds and the desire of more people to beautify their home surroundings.

The large business done by us in bulbs and seeds last fall is a sure indication there will be a greater demand

for flowers this coming spring than ever before. Our stocks were never of better quality; our supply was never so complete; we are prepared to properly care for your orders.

When ordering flower seeds, it is unnecessary to write the long names—it is sufficient to GIVE THE NUMBER which we have assigned each variety, but be careful to GIVE THE VARIETY NUMBER CORRECTLY.

All flower seeds are delivered by parcel post to your door or post-office, free of all extra charges, at prices given.

Flowers are divided into three classes—Annuals, Biennials and Perennials. Each class is described as follows:

Hardy Annuals. Easily raised and suitable for many purposes; excellent for cutting; invaluable for bedding, some for color, others for foliage effect. They will always be popular with those who want quick results with the least expenditure of time and money. Seed may be started in the open ground in early spring or sown indoors for earlier effect. Plants will flower and die in the one season.

Half Hardy Annuals. Seeds should be sown in boxes in the house or in hot-beds during March or April and the plants set out in the open ground in May. They will flower for the one season and die.

Hardy Biennials. Sow seed as you would the hardy annual. The plants will not bloom until the following year, after which they die.

Half Hardy Biennials. Seeds should be sown as you would the half hardy annuals. The plants require protection during the winter. They will bloom and die the following season.

Hardy Perennials. Seeds may be sown in early spring, or during July and August to produce plants that will flower the next season, and continue to bloom each succeeding year. Seed of some hardy perennials, if sown very early, will produce plants that will bloom the same season. It is unnecessary to give protection to these plants during the winter, but it will prove beneficial to the plants if a covering of leaves, litter or straw manure is provided. A hardy bed or border, when once established, requires practically no attention and will, if varieties have been properly selected, provide an abundance of flowers from early spring until frost.

Half Hardy Perennials. Sow seed as you would the half hardy annuals. If plants are set out in the open ground they must be lifted before frost, potted up and taken in the house during the winter.

List of Plants, Grown from Seed, Suitable for Special Purposes and Different Situations

The lists below were compiled for your convenience so that you can readily select proper varieties for different purposes or locations. These lists are by no means complete, but merely suggestive. Each variety, throughout the catalog, is clearly described; height, growing

habits and for what purposes they are best suited. Directions how to plant are printed on every package of Maule's Flower Seeds. Your success is our success—we are as much interested as you are in the results obtained from sowing Maule's Seeds.

949 *Antirrhinum, Philadelphia Pink*

Antirrhinums

or Snapdragons

Hardy Annual

Antirrhinums, in recent years, have become very popular. The long spikes are well adapted for cut-flowers. Few flowers have such a range of gorgeous colorings. They are very satisfactory for borders, bedding and pot culture for house decoration, especially during the winter, for which purpose the plants should be cut back in September. In some sections, if given protection during the winter, they will live over and furnish earlier and better blooms the second season.

Maximum, New Giant Flowered Antirrhinums

Far surpasses any strain of Antirrhinums yet introduced. Grow slightly taller than the Tall Giant Flowering varieties. The flowers are the largest of all and closely placed on the spike. Indispensable for cutting, attractive in beds or borders.

927 APPLE BLOSSOM. Long, sturdy spikes with well-shaped flowers of a delicate apple-blossom pink with a yellow lip. A magnificent variety.
Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.00

929 COPPER KING. A glowing copper-carmine shade with a bright golden-yellow lip; a most charming color contrast.
Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.00

935 *Antirrhinum, Maximum, Mixed Colors*

931 FIRE FLAME. Bright, fiery red with a suffusion of deep orange and scarlet. Large blooms, long spikes.

958 Aquilegia, Long Spurred Hybrids

962 Aquilegia, Single Mixed
960 Aquilegia, Double Mixed

Aquilegia (Columbine)

Hardy Perennial

Thrives luxuriantly in any good soil; suitable for the open garden, permanent beds or borders or edges of shrubbery. Blooms during May and June when flowers are scarce. Plants grow 2 to 3 feet high and do well either in full sun or a partially shaded location. They are lovely for cutting.

957 Long Spurred, Pink Shades. The flowers are large, long-spurred in many bright shades of pink. Blooms profusely. Pkt. 20c; 1/8 oz. 75c; 1/4 oz. \$1.25; 1/2 oz. \$2.00

958 LONG SPURRED HYBRIDS, EXTRA CHOICE MIXED. The flowers of this new strain are quite distinct from all Aquilegias, having broader petals and longer spurs. Shades of blue, orange, scarlet, yellow, white, mauve, pink, etc. Pkt. 15c; 1/8 oz. 60c; 1/4 oz. \$1.00; 1/2 oz. \$1.75

964 Arabis, Alpina

Arabis

(Rock Cross)

Hardy Perennial

964 ALPINA. One of the earliest and prettiest spring flowering perennials, the plant attaining a height of not over 6 inches. Grows in a spreading tuft. Flowers white, deliciously fragrant, and in the early spring make a pleasing contrast with the yellow flowers of Alyssum Saxatile Compactum.

Pkt. 10c; 1/4 oz. 25c; 1/2 oz. 40c.

966 Arctotis, Grandis

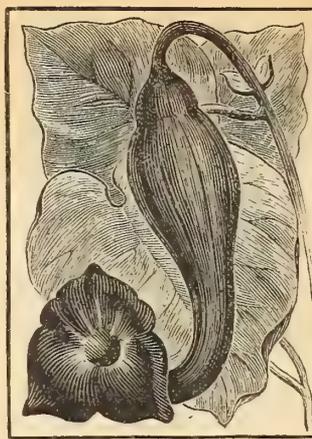

Arctotis

(Blue-Eyed African Daisy)

Hardy Annual

966 GRANDIS. Quickly forms branched bushes 2 to 3 feet high; flowers pure white on the upper surface, the reverse of the petals being lilac blue. Easily grown, blooming all summer until frost. Valuable for cutting. Withstands hot, dry weather better than many annuals.

Pkt. 10c; 1/4 oz. 30c; 1/2 oz. 50c.

970 Aristolochia, Siphon

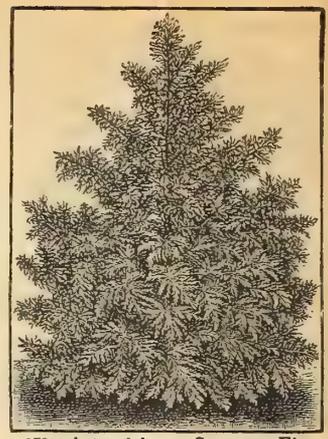

Aristolochia

(Dutchman's Pipe)

Hardy Perennial Climber

970 SIPHO. A vigorous and rapid grower with large, heart-shaped leaves, having curious brownish purple flowers which resemble pipes. Grows 50 feet or more in a season. Its handsome light green leaves give a quick dense shade.

Pkt. 10c; 3 pkts. 25c.

972 Artemisia or Summer Fir

972 Artemisia

(Summer Fir)

Hardy Annual

Forms pyramidal shaped bushes with rich, dark green foliage, 3 to 5 feet high, branching freely, giving it the appearance of a nicely developed Christmas tree. It is pretty as a pot plant or may be grown successfully as a solitary specimen, clump or hedge.

Hardy Perennial

971 FORMOSA. Height 18 inches. Very useful in the hardy border and excellent for cutting, as the long-stemmed rose-colored flowers retain their brilliant appearance for a long while after being cut. Blooms early; valuable for rockeries.

Pkt. 10c; 1/4 oz. 30c; 1/2 oz. 50c

971 Armeria, Formosa

Asparagus

(Lace Fern or Emerald Feather)

Half Hardy Perennial

For house use as pot plants, in hanging baskets, vases, etc., few plants equal the Asparagus Fern. They thrive under conditions which would kill other plants. The foliage, when cut, retains its color a long time.

974 PLUMOSUS NANUS. A desirable pot plant of wonderful beauty. Cheerful, green, fern-like foliage, of delicate texture. Individual fronds or leaves grow from 4 to 8 inches across. Very graceful when used in bouquets.

Maule's Giant American Asters Hardy Annual

In recent years we have paid particular attention to American grown Asters, for they have greatly increased the popularity of this flower. We know of no other flower so easily raised from seed, which combines so much beauty with grace and usefulness and are more satisfactory than Asters. They

make a brilliant effect when grown in masses and furnish a constant supply of cut flowers. On the inside back cover we illustrate in colors two popular types of Asters, four flowers of each. Every garden, large or small, should contain Asters.

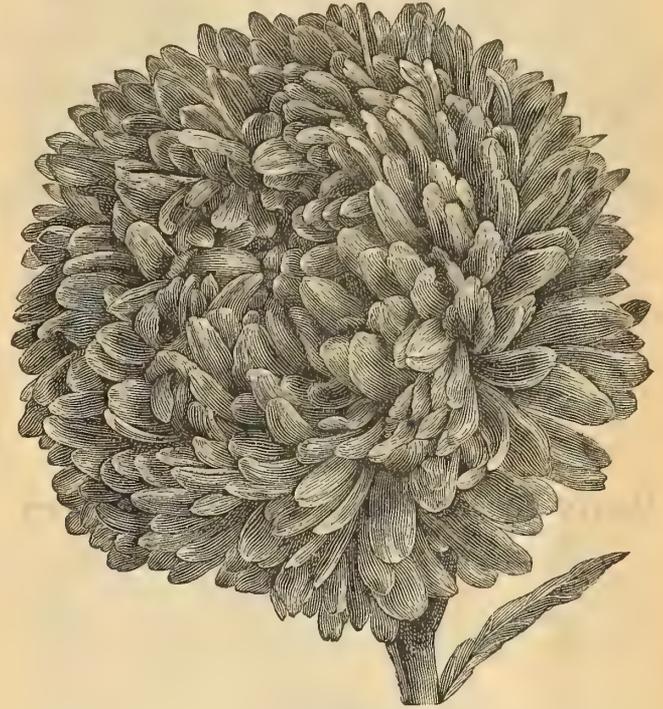

Giant Asternum Asters

A beautiful strain of the Comet type, in size the peer of the grandest Chrysanthemums; hence the appropriate name of Asternums. A conspicuous and valuable border, bedding or pot plant, attaining a height of 18 to 24 inches. The flowers are large, with long, gracefully curled petals. Unrivalled for table decoration, and particularly appreciated as cut flowers, coming in bloom a little earlier than the Crego type.

1080 Aster,
Peerless Pink

1080 Peerless Pink Aster

The plants are of robust, branching habit, 24 to 30 inches high, bearing magnificent blooms on strong stems, averaging 18 inches in length; the globular-shaped flowers grow to an immense size, are of great depth and densely petaled. The center petals are prettily incurved, while the wide outer petals reflex, making a most artistic flower. The color is a very pleasing shade of rich shell pink. It blooms about the middle of August, being at its best during the early part of September; elegant for cutting.

Balsam (Lady's Slipper) Hardy Annual

An old and favorite, quick growing annual, producing large, brilliantly colored flowers. Blooms are borne along the stem, among the leaves; frequently the whole upper part of the plant is a mass of color. Height, 2 feet. Of the easiest culture, and succeeds in any rich soil and a sunny location.

1127 Maule's Double Superb Strain

Finest Mixed

Unrivalled for large size, perfect form, robust habit and diversity of rich and delicate colors. Flowers often 2 inches across, borne in wonderful profusion, and more uniformly double than any other strain. The habit of growth is bushy and branching. The range of color includes white, rose, yellow, buff, pomegranate, red, scarlet, crimson, purple, lilac and violet. We offer all the best colors in this mixture.

Pkt. 10c; 1/4 oz. 30c; 1/2 oz. 50c; oz. 85c.

1145 Bitter Sweet

Hardy Perennial Climber

A handsome, native twining shrub of rapid growth, elegant for clinging to walls, trees, etc., and one of the most desirable for shade. Has beautiful large leaves and bears yellow flowers in May and June, which are followed in the autumn with clusters of bright orange fruit. Often used for house decoration during the winter.

Pkt. 10c; 1/8 oz. 30c; 1/4 oz. 50c.

1146 Blue Daisy

Half Hardy Perennial

Plant grows about 1 1/2 feet high, of branching habit, producing an abundance of clear, sky blue flowers. Very pretty for summer decoration in the garden, and equally desirable for winter blooming.

Pkt. 10c; 1/8 oz. 35c; 1/4 oz. 60c.

1151 Blue Lace Flower

Hardy Annual

The umbel-shaped flowers, 2 to 3 inches across, are of a rare and desirable shade,—the most beautiful clear coerulean blue. The form is similar to those of Queen's Lace Handkerchief or Wild Carrot. One of the most popular flowers. Plants grow about two feet high and bear profusely from July till frost.

Pkt. 10c; 1/8 oz. 35c; 1/4 oz. 60c.

1152 Butterfly Flower, Wisetonensis

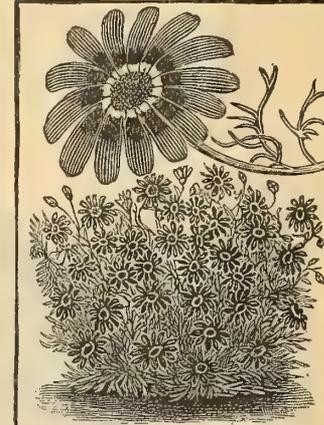

Bocconia

(Plume Poppy or Tree Celandine)

Hardy Perennial

1139 CORDATA. Leaves are glaucous green, large lobed and heart-shaped with silvery under surface. During July and August it produces freely spikes 2 to 3 feet long of large panicles of creamy white flowers. Height 5 feet.

Pkt. 10c; 1/4 oz. 25c; 1/2 oz. 40c.

1148 Brachycome, Mixed Colors

Brachycome

(Swan River Daisy)

1155 Calceolaria

1165 Calliopsis, Tall Mixed

Calceolaria (Pouch Flower)
Half Hardy Perennial

Highly ornamental greenhouse or window plants, producing richly colored pocket-like flowers in abundance in the spring. The colors include yellow, brown, maroon and even crimson. Beautifully blotched and spotted in varied colors.

1155 HYBRIDA FINE MIXED. Pkt. 25c; 3 pkts. 60c.

Calliopsis (Tickseed)
Hardy Annual

Calliopsis is easily grown and will thrive anywhere. It makes a quick growth, and produces beautiful foliage. It is one of our brightest and best summer bloomers. Gold and maroon of the most brilliant hues are the prevailing colors. Excellent for cutting and massing. By keeping the old flowers cut off, the blooming period can be lengthened until the autumn.

1165 TALL MIXED. All the best types are found in the mixture, containing the most desirable sorts and colors. One of the most useful of our garden flowers.

Pkt. 10c;
1/4 oz. 25c;
oz. 75c.

1168 Dwarf Mixed. The dwarf and tall sorts do not appear well together in one mixture, so we are offering them separately. The dwarf strains are of uniform growth from 6 to 8 inches high; fine for borders and massings.

1160 Calendula, Orange King

Calendula (Cape, Pot or Scotch Marigold)
Hardy Annual

12 to 18 inches high. Succeeds everywhere; blooms continuously from early summer until killed by frost. Particularly bright in late fall; valuable for cutting or for pot culture during the winter.

1157 Lemon Queen. Large, well-rounded full double flowers of a rich lemon-yellow. Pkt. 10c; 1/2 oz. 25c; oz. 40c.

1160 ORANGE KING. A very select strain of this popular flower. Plants grow about 18 inches high and the double, dark orange-red blossoms produced average over 3 inches across under ordinary field cultivation. For the florists, this strain is a money-maker. Pkt. 10c; 1/2 oz. 25c; oz. 40c.

1161 Mixed. All the double sorts in a grand mixture; the colors ranging through the various shades of orange and yellow. Pkt. 10c; 1/2 oz. 15c; oz. 25c.

Campanula (Canterbury Bells)
Hardy Biennial

Large, bell-shaped flowers are borne in the greatest profusion. Easily grown in ordinary gardens. Seed sown early in-doors will produce plants that usually bloom the first summer. As this type is biennial, seed should be sown each year.

1173 CUP AND SAUCER, MIXED COLORS. A distinct and exceedingly beautiful variety of Campanula which is quite an acquisition to this class of hardy biennials. The bell or trumpet of the flower grows extra large, is the same color as the flower, presenting the form of a cup and saucer. Colors are blue, rose, lilac, white, and striped which we offer only in mixture. The plants are of strong growth, and their beautiful blooms almost completely hide the foliage.

Pkt. 10c; 1/4 oz. 40c; 1/2 oz. 65c; 1/2 oz. \$1.00; oz. \$1.75

Hardy Perennial Candytuft
1186 SEMPERVIRENS. Much used for rockeries, edgings or in cemeteries. Flowers white. Height 8 inches.
Pkt. 15c; ½ oz. 60c; ¼ oz. \$1.00

Few Plants Equal Cannas for Bedding

Canna (Indian Shot Plant)
Hardy Annual

Attain a height of 3 to 7 feet and may be grown singly or in masses. Leaves green or brownish red; flowers, scarlet, crimson, yellow, cream, pink, white, etc., variously marked and dotted. Roots of any favorites may be saved by digging them in the fall and storing them in-doors during the winter.

Cannas are easily grown from seed. For best results pierce the seed in one spot with a file and soak the seeds in warm water until they show evidence of swelling. Then sow in sandy loam, and when grown to the second leaf pot off singly until the proper season for planting out. Seed sown March 28th furnished plants which bloomed July 15th.

1187 LARGE FLOWERING FRENCH AND AMERICAN. Not as tall as the old-fashioned sorts, but with flowers of great beauty; everywhere popular. These seedlings vary in color, ranging through all shades of yellow and orange to richest crimson, scarlet and vermilion. Some plain, some spotted. Our mixture contains only the best.

Pkt. 10c; oz. 40c; ¼ lb. \$1.25

1190 Cardinal Climber

Hardy Annual Climber

A splendid, new, brilliant climber of great value. A strong and rapid grower, attaining a height of 20 to 30 feet with beautiful deeply lacinated leaves and just covered with intense cardinal red flowers from midsummer till frost. Flowers measure 1½ to 2 inches across and are borne in clusters of 5 to 7 blooms each.

Pkt. 15c; ½ oz. 40c; ¼ oz. 70c.

Cypress Vine

Hardy Annual Climber

One of the very desirable and most handsome climbers. Fern-like foliage; 15 feet. Vine bears masses of beautiful star-shaped flowers which, with its finely cut foliage, makes it particularly desirable for training upon a light, ornamental trellis.

1271 Scarlet. Pkt. 10c; ½ oz. 25c; oz. 40c.
1272 White. Pkt. 10c; ½ oz. 25c; oz. 40c.
1273 MIXED. Pkt. 10c; ½ oz. 20c; oz. 35c.

Maule's Wonderful Cosmos

Hardy Annual

A tall, graceful, showy annual, enjoying the widest popularity. 3 to 6 feet high. Bloom in mid-summer and autumn.

EXTRA EARLY MAMMOTH FLOWERING. The single flowers, borne in abundance on long and graceful stems, are 4 to 5 inches across. Seeds sown out-of-doors in early spring produce plants that will bloom in 60 to 70 days, and continue until killed by frosts. The earliest single flowering strain we know of, being two months ahead of the late mammoth, which will be appreciated by those in the northern states.

- 1262 Pink. Pkt. 10c; ¼ oz. 30c; ½ oz. 50c; oz. 85c
 1263 Crimson. Pkt. 10c; ¼ oz. 30c; ½ oz. 50c; oz. 85c
 1264 White. Pkt. 10c; ¼ oz. 30c; ½ oz. 50c; oz. 85c
 1265 MIXED COLORS. The above colors in mixture.
 Pkt. 10c; ¼ oz. 25c; ½ oz. 40c; oz. 70c

LATE MAMMOTH FLOWERING. The flowers are immense and of perfect form, with wide overlapping oval petals. The flower is borne on long stems, making them exceptionally desirable for cutting. Plant grows 4 to 6 feet high, and blooms in September and October.

- 1256 MIXED COLORS. Crimson, pink and white mixed.
 Pkt. 10c; ¼ oz. 20c; ½ oz. 30c; oz. 50c.

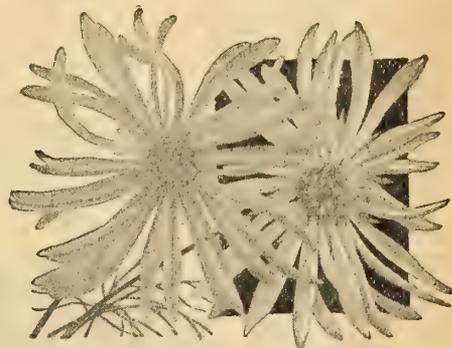

Cosmos, Extra Early Mammoth Flowering

Ray-Flowering Cosmos

This is quite a unique departure from the ordinary Cosmos. The blooms are borne most freely with a greatly increased number of petals, but instead of having flat expanded petals, these are fluted in an irregular and most artistic manner. They are most valuable for cut-flowers, as they are easily arranged into loose and airy bouquets.

- 1269 Crimson Ray. Pkt. 10c; ¼ oz. 25c; ½ oz. 40c; oz. 70c
 1270 White Ray. Pkt. 10c; ¼ oz. 25c; ½ oz. 40c; oz. 70c

Cosmos, Ray Flowering

Single and Double Cosmos Collection

4142 One packet each Pink, Crimson and White Extra Early Single and Extra Early Double Cosmos (6 pkts. in all) value 90c, for **70c**

Double Crested or Anemone Flowered Cosmos

A new type differing from the original Cosmos in the formation of the center of the flower, which develops a crown or crest, like an Anemone; the guard petals are the same in both types. We offer selected strains which come about 75% double.

EXTRA EARLY DOUBLE CRESTED COSMOS

A new strain, highly prized everywhere and especially recommended for localities north of New York as it perfects its beautiful double flowers in about 70 days from the time seed is sown and continues to bloom until cut down by frost. Forms a perfect bush about 3 feet high.

- 1248 Crimson. Pkt. 20c; ¼ oz. 50c; ½ oz. 85c
 1249 Pink. Pkt. 20c; ¼ oz. 50c; ½ oz. 85c
 1250 White. Pkt. 20c; ¼ oz. 50c; ½ oz. 85c

4141 Extra Early Double Crested Cosmos Collection

Last well when cut
 One packet each of the above 3 separate colors (value 60c) for **50c**

- 1251 MIXED EXTRA EARLY DOUBLE CRESTED.
 A well balanced mixture of the three colors.
 Pkt. 15c; ¼ oz. 45c; ½ oz. 75c; ¾ oz. \$1.25

Late Double Crested Cosmos

In the late type of double crested Cosmos, the flowers vary in their degree of doubleness, some having the Anemone center and others being perfectly double. Most artistic and beautiful in either form. Cut flowers have good keeping qualities.

- 1230 Crimson King. Pkt. 15c; ¼ oz. 40c; ½ oz. 65c
 1258 Pink Beauty. Pkt. 15c; ¼ oz. 40c; ½ oz. 65c

Dahlia
Half Hardy
Perennial

Dahlia plants, from seed sown indoors in a shallow box in March or April and transplanted as soon as danger of frost is past, will bloom abundantly the first summer and give a magnificent display of bright colors late in the season. Seed offered below is saved from large flowering double Dahlias. As these flowers are hybrids, we cannot guarantee type; no two flowers will be exactly alike and some are likely to be single-flowering. Roots of any favorites may be saved, storing them in the house during the winter.

1274 Dahlia, Extra Choice Large Flowering Double Mixed

1274 EXTRA CHOICE LARGE FLOWERING, DOUBLE MIXED. This seed is saved from choice specimens of the standard sorts, as well as the leading and best introductions that make their appearance each year. A choice mixture of show, cactus, decorative, peony and pompon varieties. Some singles may be expected.

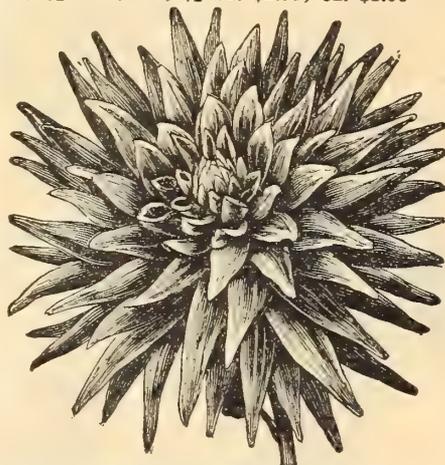

Pkt. 15c; 1/8 oz. 60c; 1/4 oz. \$1.00; 1/2 oz. \$1.75; oz. \$3.00

1275 DOUBLE CACTUS, MIXED. Most popular Dahlia grown, petals pointed (see illustration), distinct and elegant. Seed is saved from the most select and perfectly double blooms and many double flowers may be expected, besides there is always the chance of some handsome new varieties being obtained.

Pkt. 20c; 1/8 oz. 75c; 1/4 oz. \$1.25; 1/2 oz. \$2.00

1276 Double Extra Fine Mixed. This splendid assortment embraces many varieties.

1289 Delphinium, Mammoth Prize Exhibition Mixture

Delphinium (Hardy Larkspur)

Hardy Perennial

One of the most popular as well as the most beautiful perennial plants for garden decoration or cut-flower purposes. An old favorite, greatly improved.

A succession of flowers may be expected from spring to early autumn, especially if the spikes which have flowered early are cut down to the ground; fresh growth will then be produced which will give blossoms.

1290 Belladonna. Blooms more freely and continuously than any hardy Larkspur grown. The turquoise-blue color of the bloom is not equalled for delicacy and beauty by any other flower; 3 feet high.

Pkt. 20c; 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.25; 1/2 oz. \$2.00

1292 Bellamosa. Has the same free and continuous blooming qualities as Belladonna but the blooms are rich, deep blue. Just as desirable for cutting or garden decoration.

Pkt. 20c; 1/16 oz. 60c; 1/8 oz. \$1.00; 1/4 oz. \$1.75; 1/2 oz. \$3.00

1288 Gold Medal Hybrids. A choice strain of mixed hybrids, the flowers varying from the palest to the darkest shades of blue.

Pkt. 15c; 1/8 oz. 50c; 1/4 oz. 85c; 1/2 oz. \$1.50; oz. \$2.50

1289 MAULE'S MAMMOTH PRIZE EXHIBITION MIXTURE. We believe these to be the choicest strain of mixed hybrids in cultivation, both for size of bloom and spike, as well as rich and delicate colors. Immense spikes of the most beautiful flowers of every imaginable shade of blue, varying from the palest silvery-blue to the deepest indigo. The blooming season is long; in fact they will bloom from spring till fall.

Pkt. 25c; 1/16 oz. 75c; 1/8 oz. \$1.25; 1/4 oz. \$2.25; 1/2 oz. \$4.00

Dianthus (Pinks) Concluded on Page 86

Hardy Annual

Dianthus are one of the most popular and satisfactory of our summer flowers. The plants soon become a mass of bloom and continue so until hard frost. Grow 12 to 15 inches high and literally covered with flowers of rich and varied colors.

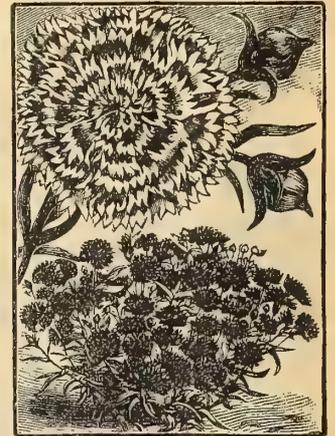

1307 LUCIFER. Double Fringed Pinks. Flowers of a beautiful orange scarlet color, nearly two inches across, on long stems, which makes it very valuable for cutting. Plant grows about 12 to 15 inches high. A fine bedder.

Pkt. 10c; 1/8 oz. 30c; 1/4 oz. 50c; 1/2 oz. 85c; oz. \$1.50

1304 Dianthus, Snowball

1294 Dianthus, Heddwigii

1304 SNOWBALL. Large, double white flowers, which are fine for cutting. Pkt. 10c; 1/8 oz. 25c; 1/4 oz. 40c; 1/2 oz. 70c.

1296 Dianthus, Marvelous

1294 HEDDEWIGII. Double flowers ranging from white to crimson, some laced or striped. All colors in a mixture.

Pkt. 10c; 1/4 oz. 30c; 1/2 oz. 50c; oz. 85c.

1296 MARVELOUS. The same as Dianthus Wonderful or Fringed Pink. A remarkable, distinct new Fringed Japanese Pink. The plants grow from 12 to 15 inches high, and produce large flowers 3 to 4 inches across, on stiff, upright stems. From a third to a half of the flower seems to consist of graceful fringes, turned and twisted in all directions, giving an appearance both pretty and unique. A wide color range.

Pkt. 10c; 1/8 oz. 25c; 1/4 oz. 40c; 1/2 oz. 65c

1293 Dianthus, Royal Pinks

1306 Dianthus, Mourning Cloak

1293 ROYAL PINKS. Single flowering blossoms of a new shape, the petals being curled, waved and twisted, each covering half of another; beautifully fringed. The colors vary from white to intense red. We offer a fine mixture.

Pkt. 10c; 1/8 oz. 25c; 1/4 oz. 40c; 1/2 oz. 65c; oz. \$1.00

1302 Salmon King. The flowers are large, well doubled and nicely dentated, appearing in great numbers. The color is a brilliant salmon rose.

Pkt. 10c; 1/8 oz. 30c; 1/4 oz. 50c; 1/2 oz. 85c; oz. \$1.50

1306 MOURNING CLOAK. A double Dianthus of so dark a maroon as to be almost black. Every petal faintly bordered with white. Pkt. 10c; 1/8 oz. 25c; 1/4 oz. 40c; 1/2 oz. 65c.

1310 Dianthus, Plumaris, Double and Single Mixed

Hardy Perennial Dianthus

(Grass, Border, Feather, Clove or Spice Pinks)

PLUMARIS. The flowers are large, borne in a great variety of colors and markings, with fringed edges; sweet scented, spicy fragrance and almost every color known is shown to some degree. They are excellent, hardy plants.

Ferns

Half Hardy Perennial

Ferns can be grown easily from seed. Fill a clean pot with fine earth. Put the pot in a saucer and immerse in boiling hot water to kill all weed seeds or insects in the soil. After the soil has cooled strew the fern seed over the top of the soil but do not cover it. Put a piece of glass on top of pot, and keep the saucer full of water. Never put water on top of soil. In a short time the soil will be covered with a green moss-like growth, and in a few weeks the little fern leaves will appear.

1335 CHOICEST MIXED. From a fine collection. Pkt. 25c.

1338 Gaillardia, Lorenziana

1341 Gaillardia, Fine Mixed

Gaillardia (Blanket Flower)

Hardy Annual

Exceedingly beautiful, growing 1 to 2 feet high. The flowers are very showy and excellent for beds or for cutting. Bloom in remarkable profusion from early summer till frost.

1338 LORENZIANA, MIXED. Double flowers in rich shades of crimson, garnet, lemon, orange, etc. Very attractive. Pkt. 10c; ¼ oz. 25c; ½ oz. 40c; oz. 70c.

Hardy Perennial Gaillardia

The perennial Gaillardia is fine for cutting; should be in every hardy border as they take care of themselves, require no protection and will thrive in almost any soil or position. If seed is sown early, the plants will begin blooming in June and continue till frost.

1341 FINE MIXED. Flowers of wonderfully large size, highly colored and many beautiful markings. Pkt. 10c; ¼ oz. 30c; ½ oz. 50c; oz. 85c.

1348 Geranium, Zonale Mixed

Geranium (Pelargonium)

Half Hardy Perennial

Easily raised from seed which if sown early will produce plants that will flower the first year. Geraniums enjoy an almost universal popularity. They are very popular plants, suitable for pot culture in the winter or for bedding purposes in the summer. They form nice, bushy plants, bearing continuously many gorgeous flowers in variously brilliant colors.

1348 ZONALE MIXED. Our seed is saved from only the best and largest flowers which are greatly improved and enlarged, round, and of the most perfect form. The colors include shades of crimson and scarlet, pink, rose, salmon, blush, white, etc., in mixture. Pkt. 20c; 1/16 oz. 50c; ¼ oz. 85c.

1346 Geranium, Finest Mixed

1358 Gloxinia, Choicest Hybrids

1346 FINEST VARIETIES MIXED. The seed for this mixture has been saved from a very costly collection of both double and single varieties. Pkt. 25c; 3 pkts. 60c.

1344 Apple Scented. This favorite with sweet scented leaves can best be grown from seed. Pkt. 20c; 3 pkts. 50c.

1345 Lady Washington. Also called Pelargonium or Pansy Geranium. Seed saved from the finest sorts.

Pkt. 25c; 2 pkts. 45c; 5 pkts. \$1.00

Gourds, Ornamental

1371 Gypsophila, Paniculata

Gourds, Ornamental

Hardy Annual Climber

These are of various shapes and colors; some large, some small. All are hard shelled, and will keep for years. Grow 10 to 30 feet high. Excellent for covering porches, walls, outbuildings and waste places. The small Gourds are excellent toys for children, while the larger ones may be used as bowls, dippers, etc.

1366 SMALL VARIETIES. Pkt. 5c; ½ oz. 20c; oz. 30c.
1367 LARGE VARIETIES. Pkt. 5c; ½ oz. 25c; oz. 40c.

Gypsophila (Baby's Breath)

Hardy Annual

Free flowering plants, the flowers of which are in great demand for cutting or combining with other flowers. Several sowings should be made during the season to keep up a continuous supply of bloom.

1368 ELEGANS ALBA GRANDIFLORA. An improved, large flowering pure white form of the popular annual "Baby's Breath." In great demand.

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. \$1.00

1370 Rose. A pretty rose pink, equally as valuable for cutting as the white, either alone or with other flowers.

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. \$1.00

Hardy Perennial Gypsophila

Of the easiest culture, succeeding in open, rather dry places. Used very much in bouquets. Will bloom the first year if seed is sown early.

1371 PANICULATA. Misty white panicles of flowers; fine for bouquets. Pkt. 10c; ¼ oz. 30c; ½ oz. 50c; oz. 85c.

are strong and well-developed. Maule's ROSES are heavy, field-grown plants. Maule's SHRUBS are two-year-old extra selected plants. Maule's FRUIT TREES are two-year-old with well-branched heads. You cannot buy better anywhere. Order Early.

Nasturtiums

Hardy Annual

Nasturtiums prefer a good, well-drained soil; if soil is too rich they are inclined to produce more leaves and less flowers. The seed pods can be gathered while green for pickling. Besides the ordinary-leaved sorts we are offering the Ivy-leaved, and the variegated-leaved varieties. Our mixtures are the finest obtainable anywhere.

Tall or Climbing Nasturtiums

Well adapted for ornamental purposes. They should have sticks or other supports, or may be trained over rock-work, trellises, fences, arbors, porches, or allowed to ramble over the ground where they will bloom profusely from early summer until frost. Grow 10 to 12 feet high.

1501 Tall Variegated or Silver Leaved, Mixed

The plant has a most striking aspect, as each leaf is variegated in a distinctly different degree with silver, yellow, white and green, so that no two are alike. The flowers embrace a fine assortment of colors.

What a pathetic sight it is to see a would-be home with bare unkempt surroundings when a few packets of flower seeds would provide enough plants to make it attractive.

For quick results, use our Hardy Perennial Plants, Shrubs, Roses, Ornamental Vines and if space permits set out some fruit trees and small fruits. You will never regret having done so.

For bulbs of Oxalis, see page 111 of this Book

Maule's Giant Pansies (Heartsease) Hardy Biennial

FOR many years, in fact ever since we have been in business, we have given particular attention to Pansy seeds, until we really think our strains of Pansies are as good as can be found anywhere in the world. Pansies demand good soil, thriving best in a cool, moist but well drained position. Do not plant Pansies in the shade of a tree or building, as this causes straggly plants with very few blooms. Seeds

sown in April or May will produce blooming plants the last of June, which will continue flowering until the end of the season. For early spring blooming, sow seeds in August and give plants protection during the winter. We know that the results obtained from our Pansy seeds have been so remarkable that this is the reason the demand for this beautiful and popular flower increases with us so much every year.

1600 Maule's Giant Phenomenal

The wonderful size, colors and veinings of this large Pansy are unsurpassable

After years of close acquaintance with Phenomenal Pansy, since we introduced it to the American public, we again cordially commend it. It is as unique as it is large and beautiful. Thousands of our friends now know and admire them. The strain originated in France, consisting of the largest, choicest, and most "phenomenal" specimens that could be selected. Phenomenal Pansy exhibits those captivating wine red shades that are so rare among flowers.

1614 Maule's Prize Mixed Giant Pansies

1614 Maule's Prize Mixed Giant Pansies

A carefully prepared mixture of all the richest, handsomest and largest Pansies known, in a full range of colors.

Look for blossoms 2½ to 3½ inches across, of perfect texture, embracing an endless variety of colors. Year by year we watch the production of American and European specialists and secure everything truly meritorious for incorporation into our Prize Mixture.

Pansy seed is a very high priced commodity, and it is next to impossible for the average flower lover to buy all the new sorts on the market. All the types that are really desirable will be found in Maule's Prize Mixture, which is largely grown for exhibition.

Pkt. 25c; 1/16 oz. 85c; ½ oz. \$1.50;
¼ oz. \$2.75; 1/8 oz. \$5.25; oz. \$10.00

1598 Giant Madame Perret

Comprised of all shades of wine red, from the light red, white edged bright red to the deep purple of splendid magnificence. Every blossom exhibits the soft wine-red color, in varying degree, either faint or intense.

Pkt. 10c; 1/16 oz. 35c; ½ oz. 55c; ¼ oz. 95c; ½ oz. \$1.50; oz. \$2.50

1603 Giant President McKinley

Almost black, with yellow margin; 2½ to 3 inches in diameter. The blotches are really dark reddish brown, exceedingly rich.

Pkt. 15c; 1/16 oz. 60c; ½ oz. \$1.00; ¼ oz. \$1.75; ½ oz. \$3.00

1606 Bugnot's Giant Superb Blotched

The predominating colors to be found in these Giant Pansies are shades of red, bronze, reddish cardinal, and reddish-brown. Petals handsomely blotched and bordered with light colors.

Pkt. 15c; 1/16 oz. 45c; ½ oz. 70c; ¼ oz. \$1.15; ½ oz. \$2.00

1612 Giant King of the Blacks

Glossy black. Pkt. 10c; ½ oz. 50c; ¼ oz. 85c; ½ oz. \$1.50.

1598 Pansy, Giant Madame Perret

Maule's Bedding Pansies

Valuable for bedding or borders where a mass of color is wanted. Flowers are not of the largest type, but bloom profusely throughout the season.

1615 Orchid-Flowered

The ground color is mostly light, while the petals are marked with large brown or golden blotches. The colorings include shades of pink, rose, orange, lilac and chamois. Pkt. 15c; 1/16 oz. 45c; ½ oz. 75c.

1633 Choice Mixed

A mixture of all varieties, giving a remarkably fine display of colors. The flowers are not of the largest type, but plants are of strong, sturdy growth and profuse bloomers. Pkt. 10c; ½ oz. 30c; ¼ oz. 50c; ½ oz. 85c; oz. \$1.50

1634 Extra Fine Mixed

All the costly European varieties of the finest type are included in this grand mixture. The size of the flower has been somewhat sacrificed to obtain the most gorgeous colors. Pkt. 10c; ½ oz. 40c; ¼ oz. 65c; ½ oz. \$1.10; oz. \$1.90

1630 Pansy, Early Flowering Hardy

1630 Early Flowering Hardy, Mixed Colors

These Pansies are of great value, owing to the extreme hardiness of the plants and their extraordinarily early blooming time, producing their flowers 4 to 6 weeks earlier than any other variety of Pansies. Full grown plants will winter over in the open ground with but a slight protection of leaves, litter, etc., in very cold latitudes, and will begin flowering, so-to-say, under the snow in February and March, when other Pansies are only forming buds. These delicately perfumed Pansies are of good size and will continue to bloom in great profusion until late summer.

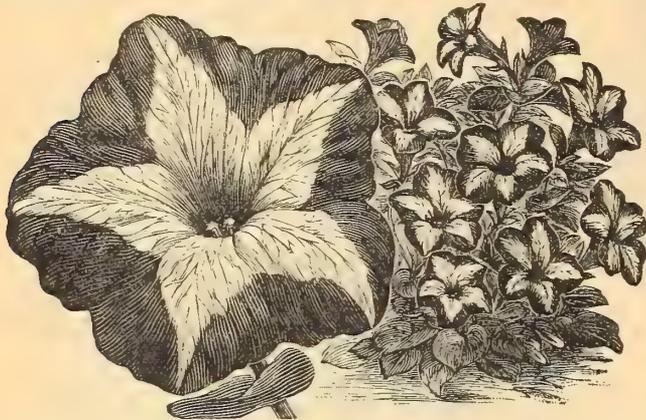

Pkt. 15c; 1/16 oz. 45c; ½ oz. 75c; ¼ oz. \$1.25;
½ oz. \$2.25; oz. \$4.00

See opposite page for other varieties of Pansies which we can supply.

Maule's Showy Petunias (Concluded on Page 99)

Hardy Annual

No annual flower is more widely used than the Petunia. It begins to bloom early, and lasts the whole season, until killed by frost. Petunias succeed best in rich soil and a sunny location. While most varieties are of the trailing habit, some are quite erect.

1647 HOWARD'S STAR. Flowers are 2 to 2½ inches in diameter, of fine texture, with more or less veining. Ground color a crimson maroon. In the center of many flowers is a five-rayed star of light blush pink or white, while some are beautifully striped or blotched. Height of plant, 1½ to 2 feet.
Pkt. 10c; ½ oz. 55c; ¼ oz. 95c; ½ oz. \$1.75

1663 BURPEE'S BLUE. This is an outstanding new Petunia altogether different from other so-called "Blues" introduced heretofore. Burpee's Blue is a rich, clear ultramarine-blue free from any purplish cast or pink tint. The flowers measure 2½ to 3½ inches in diameter. They are borne with the greatest freedom on strong and vigorous plants.

Burpee's New Blue Petunia is a wonderful variety for bedding or for growing in window or porch boxes; a unique color, greatly admired.

Pkt. 25c; 1/16 oz. \$1.00; ½ oz. \$1.75; ¼ oz. \$3.00

1637 Rose of Heaven. Rich and brilliant deep rose flowers. Of compact, erect, very dwarf habit and free flowering.

Pkt. 10c; 1/16 oz. 35c; ½ oz. 60c; ¼ oz. \$1.00

1639 Violaeca. Flowers are of a beautiful steel blue or deep violet with no trace of magenta.

Pkt. 10c; 1/16 oz. 35c; ½ oz. 60c; ¼ oz. \$1.00

1640 DWARF BEDDING MIXED. A beautiful mixture of all dwarf, erect growing Petunias. A wonderful array of colors. Very fine in masses.

One packet each of the 4 separate colors of Balcony Petunias (value 60c)..... for **45c**

1638 SELECTED RUFFLED GIANTS. Considered by many the handsomest Petunia in the world, not only on account of its great size, but because of its rich colors and markings and its fringed or notched petals. The blooms are exquisitely ruffled on the edges. Some flowers are 5 inches across. The tints are rich and varied, curiously veined and penciled.
Pkt. 25c; 2 pkts. 45c; 5 pkts. \$1.00

1645 Single Fringed Varieties. The flowers are enormous, with ruffled or fringed edges. The colors are many and exceedingly rich.
Pkt. 25c; 2 pkts. 45c; 5 pkts. \$1.00

All Maule Seeds Teem with Vigorous, Healthy Life; Always They Are TESTED; Always They Are GUARANTEED.

1636 DOUBLE EXTRA LARGE FLOWERING, MIXED. Double Extra Large Flowering Petunias are without doubt the finest ever offered to the public. For years we have made a specialty of this strain, constantly improving it by selection. The seed which we save from our double flowering Petunias produces a high percentage of double flowers, the remainder being choice, large single flowers of extra fine quality. The weaker seedlings should be carefully saved as they usually produce the finest double flowers.
Pkt. 30c; 2 pkts. 50c; 5 pkts. \$1.00

1590 Pentstemon, Mixed

1661 Physostegia, Virginica

Pentstemon (Beard Tongue)

Hardy Perennial

1590 MIXED. It grows 2 to 3 feet high, producing long spikes of white, pink, scarlet, blue, etc., spotted and marked flowers. If sown early they will bloom the first year. The graceful spikes are bedecked with flowers from July till frost.
Pkt. 10c; 1/8 oz. 30c; 1/4 oz. 50c; 1/2 oz. 75c.

Physostegia (False Dragon Head)

Hardy Perennial

1661 VIRGINICA. Forms dense bushes 3 to 4 feet high, bearing during the summer months spikes of tubular, delicate pink flowers, somewhat resembling a gigantic Heather.
Pkt. 10c; 1/8 oz. 40c; 1/4 oz. 70c; 1/2 oz. \$1.25

1662 Platycodon, Mariesi

1709 Primula, Chinensis, Mixed

Platycodon (Japanese Bell Flower)

Hardy Perennial

A low growing bushy plant, 1 to 2 feet high, producing very showy flowers from July until frost. Easily raised from seed.

1662 MARIESI. Large, open, bell-shaped flowers of a rich violet blue. Very handsome. Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 85c.

1699 OBCONICA, MIXED COLORS. Of the easiest culture in window or conservatory; flowering profusely and continually with little care.
Pkt. 20c; 1/128 oz. 50c; 1/64 oz. 75c.

PRIMULA CHINENSIS. Also called Chinese Primrose. Profuse bloomers and among the finest and most popular of the winter and spring flowering window or greenhouse plants, doing well in cool rooms. Plants are sturdy and robust; the flowers cut and fringed.

1709 FINEST MIXED. All shades and colors, finely fringed.
Pkt. 20c; 1/128 oz. 60c; 1/64 oz. \$1.00; 1/32 oz. \$1.50

1696 Portulaca, Single Large Flowered Mixed

Portulaca (Rose Moss or Sun Plant)
Hardy Annual

A favorite for edgings, rock-work, etc. Will grow and bloom profusely in a dry, hot, sunny location, where almost any other plant would die. Blooms profusely from early summer until autumn. Only 6 inches high.

1696 Single Large Flowered Mixed, All Colors. Many striped and variegated sorts will be found in this mixture. Pkt. 5c; ¼ oz. 25c; ½ oz. 40c; oz. 70c.

1697 DOUBLE LARGE FLOWERING MIXED. Brilliant shades, including white, yellow, salmon and carmine. Seed saved from perfect double flowers will, at times, produce some singles. Pkt. 10c; ½ oz. 50c; ¼ oz. 85c; ½ oz. \$1.45.

1654 Phlox Drummondii, Large Flowering, Finest Mixed

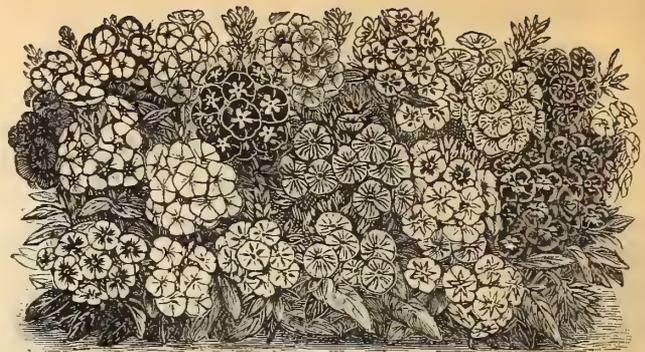

Phlox Drummondii (Texan Pride)
Hardy Annual

The annual and perennial Phloxes are not rivaled among garden flowers in brilliancy of bloom. They are strong growing, healthy plants, with pretty foliage, and belong in every garden, being one of the most brilliant and at the same time one of the easiest and most satisfactory plants which can be readily grown from seed. The fine blooms, produced in large trusses, furnish a grand display in the garden and are very effective for table decoration.

Maule's Large Flowering

The seeds for this large flowering strain of ours are saved from only the largest individual flowers and heads of the finest Phlox grown. They come into bloom quickly from the seed, and flower a long period, until cut down by frost.

1655 Grandiflora Mixed Phlox

Large flowered varieties in a superb mixture of the choicest shades and colors, which include pure white, deep and showy red, rose with white eye and other shades, excellent for vases, pot plants, hanging baskets, etc., or for bedding.

Pkt. 10c; ¼ oz. 20c; ½ oz. 35c; 1 oz. 60c; oz. \$1.00

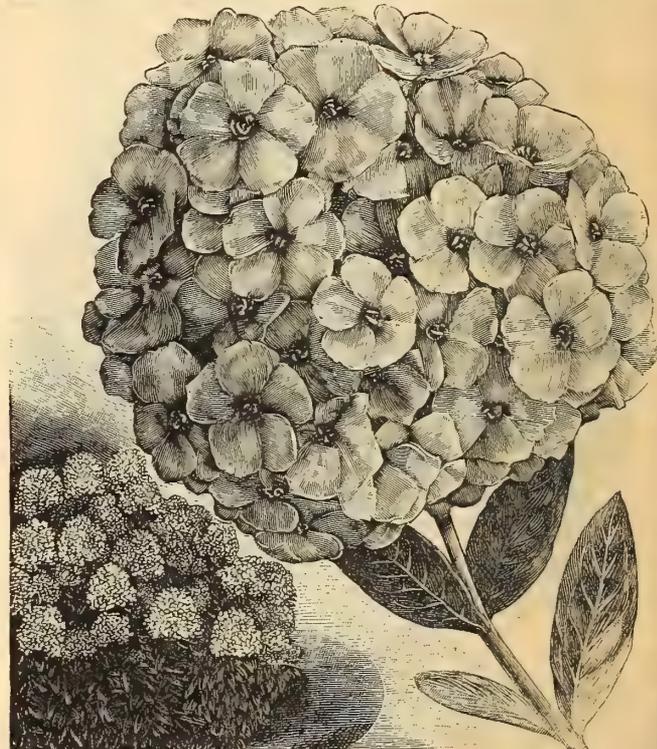

1658 Phlox, Star of Quedlinburg

1658 STAR OF QUEDLINBURG, FINEST MIXED. Large flowers, with curiously pointed and toothed blossoms, making them appear to have a star-like form, the effect of which is remarkable. The flowers are of various shades, embracing all the colors to be found in the other varieties of Phlox.

Pkt. 10c; ¼ oz. 35c; ½ oz. 55c; 1 oz. \$1.00; oz. \$1.75

Hardy Perennial Phlox

Of late years beds and clumps of these beautiful Phloxes are becoming more popular everywhere. Plants grow 2 to 3 feet high and bear flowers of many colors. One of the most satisfactory perennials.

1653 HARDY PERENNIAL PHLOX, ALL COLORS MIXED. This seed is saved from a very fine collection of all colors, and gives excellent results. They are perfectly hardy, need no protection, and will flourish in any soil.

Pkt. 25c; ½ oz. 60c; ¼ oz. \$1.00; ½ oz. \$1.75; oz. \$3.00

POPPY

Hardy Annual

Showy and easily cultivated. A favorite everywhere. Flowers of various sizes, shapes and colors, both single and double. Always conspicuous and brilliant.

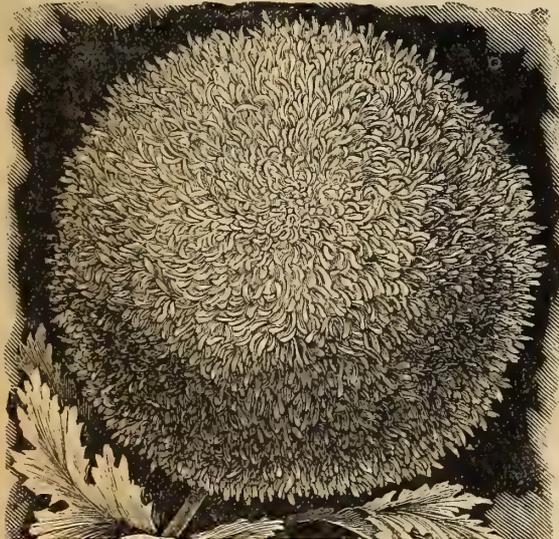

1673 DOUBLE CARNATION, MIXED COLORS. Produces large Carnation-like flowers, most excellent for massing or borders, flowers being very double. One of the most beautiful varieties, and we offer a very fine range of colors in our mixture. Pkt. 10c; ½ oz. 20c; oz. 35c.

1677 Maule's Hybrid Poppies

The distinctive features of these new poppies are their size, their rare coloring and color combinations, and the pleasing crinkly appearance of their petals. Their double and semi-double flowers run from 2 to 2½ inches in diameter, in pure white, pink, rose, salmon, salmon-orange, scarlet and crimson; also in lovely combinations of broad and narrow-banded white-edged scarlet and pink. We can supply this poppy in mixed colors only.

1679 Poppy, Admiral

1675 AMERICAN LEGION. This new Shirley Poppy is a dazzling orange scarlet with yellow anthers. Plants are of very erect growth and the flowers very large.

Pkt. 10c; ¼ oz. 25c.

1674 American Flag. Flowers very large and double, snow white bordered with scarlet. Pkt. 5c; ½ oz. 25c.

1690 Flanders. Vivid scarlet red—the well-known Poppy of Flanders field. Particularly showy when grown in masses. Pkt. 10c; ¼ oz. 25c.

1679 Admiral. Large, round flowers of glistening white, with a broad band of bright brilliant scarlet around the top of each petal.

Pkt. 10c; ¼ oz. 25c.

Hardy Perennial Poppy

Oriental Poppies are one of the showiest flowers in the garden in early spring. Flower stems grow 2½ feet high. Foliage disappears in July and August.

1664 ORIENTAL PERENNIAL HYBRIDS, MIXED. Flowers of gorgeous brilliancy. Colors range from soft flesh and rose to brilliant dazzling scarlet.

Pkt. 10c; ½ oz. 30c.

1665 Hardy Perennial. A mixture of Oriental and Iceland Poppies.

Pkt. 10c; ½ oz. 30c.

Iceland Poppies

Of graceful habit, with bright green foliage formed in tufts, from which arise slender stems about a foot high bearing brilliant flowers the entire season if seed pods are not allowed to form.

1667 NEW HYBRIDS ICELAND, MIXED COLORS. Containing all the new colors from sulphur yellow through the many shades of orange to salmon rose.

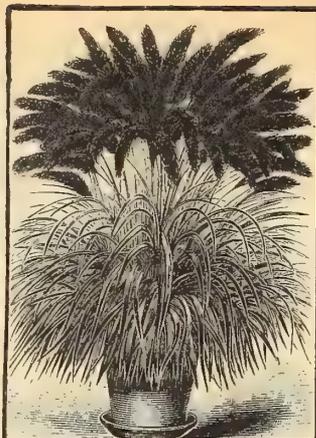

Pkt. 10c; ½ oz. 30c.

1664 Poppy, Oriental Perennial Hybrids

1711 Pyrethrum, Roseum, Single

1710 Purple Feather Grass

Pyrethrum

Hardy Perennial

Handsome, herbaceous garden plants about 2 feet high, bearing Daisy-like or Aster-like flowers, 3 or 4 inches across, ranging in colors from light pink to deep red with yellow centres. Blooms in May and June and again in the fall; one of the best cut flowers.

Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden. Flowers are bright and elegantly borne on long stems; most convenient for decoration. In form, the double varieties are somewhat aster or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be called Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest Winter without protection. The single-flowered varieties are variable colored Marguerites and possess a wide range of color, very popular. Thrive in any good soil.

1711 Roseum, Single Mixed. Pkt. 10c; 1/8 oz. 40c.

1710 Purple Feather Grass

Tender Perennial

A very beautiful and popular ornamental house or border plant of easy culture. As useful for hall or table adornment as a palm, and having the advantage of rapid growth. The graceful, narrow, recurving leaves are over-topped by elegant feathery plumes a foot long. Heads borne from July until frost, and the whole plant is eventually veiled in a purple cloud. Pkt. 10c; 1/8 oz. 40c; 1/4 oz. 70c.

Ricinus

(Castor Oil Beans)

Hardy Annual

A stately, strong-growing and highly ornamental tree-like annual plant; 6 to 14 feet high, very effective as a foliage plant. Highly desirable for centres of beds or for back-grounds. By planting Ricinus beans on the borders of gardens, moles may be kept away, as they will leave as soon as they get a scent of the plant.

1714 Ricinus, Zanzibarensis Mixed

1713 RED SPIRE. Rich bronzy-green leaves with prominent red ribs and veins. Plant grows 6 feet high and produces numerous flower spikes or seed-pods of a brilliant rosy-crimson, most effective and ornamental.

Pkt. 10c; oz. 35c; 1/4 lb. \$1.00

1714 ZANZIBARENSIS. The tallest growing Ricinus, 10 to 14 feet high, variously colored leaves, sometimes 2 feet across. Pkt. 10c; oz. 25c; 1/4 lb. 70c.

1715 Mixed. All the best plain and fancy varieties in a grand mixture. Pkt. 10c; oz. 20c; 1/4 lb. 60c.

1722 Salvia, Drooping Spikes

Salvia (Scarlet Sage)

Hardy Annual

Salvias are favorite bedding plants bearing long spikes of flowers profusely during the whole summer until frost; also grown as pot plants during the winter.

1722 DROOPING SPIKES. The very best Salvia obtainable. The flowers are produced so abundantly as to bend the branches and give them a leaning habit, hence the name of Drooping Spikes. It is a magnificent bloomer; desirable for lawn or garden whether planted in solid beds or in borders.

Pkt. 15c; 1/8 oz. 60c; 1/4 oz. \$1.00; 1/2 oz. \$1.75; oz. \$3.00

1724 AMERICA OR GLOBE OF FIRE. The earliest, freest and most continuous blooming of all Salvias, being of uniform growth not exceeding 15 inches in height, with spikes of brilliant scarlet flowers borne well above the foliage. Particularly suited for pots, beds or borders.

Pkt. 20c; 1/8 oz. 70c; 1/4 oz. \$1.10; 1/2 oz. \$2.00; oz. \$3.50

1723 Salvia, Bonfire

1738 Saponaria, Vaccaria

1723 BONFIRE. One of the finest for bedding. Compact, oval bushes, 2 feet in height, with long spikes of scarlet flowers standing clear above the foliage, which completely cover the plant. A very popular variety for beds and borders where a dwarfer red variety than Drooping Spikes is required. Very extensively grown.

Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 85c; 1/2 oz. \$1.50; oz. \$2.50

1727 Farinacea. (The Silver Sage.) Tall silver lavender or blue spikes rise in great numbers above the foliage. A handsome bedding plant for groups, borders or massing. With a slight covering during the winter, this variety is hardy in many localities, but it is best to treat it as an annual. Pkt. 10c; 1/8 oz. 60c; 1/4 oz. \$1.00; 1/2 oz. \$1.75; oz. \$3.00.

1733 Mixed, All Sorts. We have received so many requests for Salvia seeds mixed, that we are offering a mixture of the scarlet, carmine, salmon and purple.

Pkt. 15c; 1/8 oz. 50c; 1/4 oz. 85c; 1/2 oz. \$1.50; oz. \$2.50

Saponaria

Hardy Annual

1738 Vaccaria. Satiny pink flowers somewhat like an enlarged Gypsophila, valuable for cutting and largely used for mixing with other flowers. Grows about two feet high. Make several sowings for a succession of bloom. Easily grown; free flowering. Pkt. 10c; 1/2 oz. 20c; oz. 30c.

1721 Salpiglossis, Emperor

1742 Scabiosa, Mixed Double

Salpiglossis (Painted Tongue)

Hardy Annual

Height, 24 to 30 inches high, bearing many Gloxinia-like flowers 2 to 2½ inches across, with odd and beautiful velvety markings; the colors red, blue, yellow, pink, etc., in various shades are pencilled and veined with golden yellow or other colors. Easily grown, flower profusely and are fine for cutting as well as being showy in beds or borders.

1720 Hybrids Mixed. Exquisitely veined and marbled.

a few flowers you have never grown before. There may be some listed in this book that you don't know, but are worthy of a place in your garden.

1762 Sunflower, Double Chrysanthemum-Flowered

Sunflower (Helianthus)

Hardy Annual

Of easy culture, and the newer sorts are among the most ornamental and effective of all garden annuals. The single flowering sorts are indispensable for cutting. Bloom early and continue until frost.

1762 CHRYSANTHEMUM-FLOWERED. Fine, perfectly double golden flowers, resembling Japanese Chrysanthemums; 6 to 10 inches in diameter. Plants grow 5 to 6 feet high.

Pkt. 10c; ½ oz. 30c; oz. 50c; 2 oz. 85c.

1763 Globe of Gold. (Dahlia Sunflower, Golden Quilled Sunflower.) A double Sunflower, attaining a height of but little over 3 feet. Each branch carries a beautiful globe-shaped flower of richest golden yellow.

Pkt. 10c; oz. 30c; 2 oz. 50c.

1764 MINIATURE MIXED. (Cut and Come Again.) Finely formed single flowers of graceful appearance, many with petals beautifully twisted like those of a Cactus Dahlia. Of many colors, pale yellow, golden yellow and creamy white predominating. Pkt. 10c; ¼ oz. 25c; ½ oz. 40c.

1766 Red. Some of the flowers are of a chestnut red color. others are red, tipped yellow, while others are yellow washed with red. Grows to a height of 6 feet. Pkt. 10c; ½ oz. 30c.

1767 PURPUREUS HYBRIDS. In this class of Sunflowers the original yellow has almost completely disappeared. Shades of the most delicate pink to the deepest purple are predominant in this mixture. 3 to 4 feet high. Pkt. 10c; ¼ oz. 30c.

1744 Smilax

Half Hardy Perennial Climber

A popular indoor climber. Leaves are a deep, glossy green. Habit of growth extremely graceful. Easily grown from seed. Pkt. 10c; ¼ oz. 25c; ½ oz. 40c; oz. 70c.

Stocks (Gilliflower)

Hardy Annual

Nothing can excel Stocks for profusion of bloom, beauty and fragrance. The flowers are large and double, and excellent for bedding or pot culture.

CUT AND COME AGAIN, PERPETUAL BRANCHING. Produces numerous side branches, each bearing delightfully fragrant double flowers. Seed started indoors in March or April should produce plants that will begin to bloom in mid-summer and continue until frost.

1746 Brilliant. Beautiful spikes of blood red flowers. Pkt. 10c; ⅓ oz. 50c; ¼ oz. 85c; ½ oz. \$1.50

Summer Flowering Giant Spencer Sweet Peas

Four of the Greatest New Sweet Peas for 1928

1846 Fluffy Ruffles

A great, big flower: vigorous and free blooming—the first of the Ruffled Sweet Peas. A new type, duplexed and frilled, with long-stemmed, well-proportioned sprays of four almost globular flowers. No other Sweet Pea exhibits such a consistent doubling and ruffling of its petals. Twelve sprays make a more massive bunch than eighteen sprays of an ordinary Spencer Sweet Pea.

A lovely rich rose-pink, a gleam of soft salmon, and a bright creamy undertone blend into a harmonious cream-pink shade that must be seen to be appreciated. A flower of exquisite texture and sweet fragrance. Pkt. (25 seeds) 25c.

1847 Adorable

A new color in Sweet Peas which will make it tremendously popular. A delightful shade of clear salmon-cerise on a cream ground. There is just a suspicion of bronze around the edge of the standard, which, together with the bronzy suffused reverse, adds a glistening sheen to a bunch of Adorable.

Strong and sturdy, the many four-flowered sprays are borne on long stems in the greatest profusion. Pkt. (25 seeds) 25c.

1848 Happiness

Happiness is a delightful shade of coral-pink on cream. The wings are slightly deeper and shade to rose-pink. A tone of light salmon overlies the standard and wings. The lemon keel and the lemon blotch at the base of the standard give the finishing touch to a flower of wonderful beauty. When bunched, the color effect is a bright eosine-pink with a rose suffusion. A fascinating, refined, yet lively color. Pkt. (25 seeds) 25c.

1849 Brilliant Rose

Brilliant Rose is a marvelous new shade—glowing bright tyrian rose with a scintillating suffusion of bronzy rose. Clear and sparkling. Distinct from all others and more desirable than any in its color class. Of such pure and glistening color that other rose varieties appear dull by comparison. Pkt. (25 seeds) 25c.

Three of the Finest Sweet Peas Recently Introduced

1857 Royal Blue
Giant Spencer Sweet Pea

1855 Delightful

A rich terra cotta cerise suffused orange or scarlet red. A color never before produced—the most appealing, in its glowing beauty, of all the richer toned varieties; bright and shining even on dull days, intensified in hot sunshine and startlingly brilliant under artificial light.

Pkt. 20c; ½ oz. 75c; oz. \$1.45;
¼ lb. \$4.50

1856 Gladness

A soft coral pink, intensified by a suffusion of a somewhat deeper shade toward the base of the standard and wings. A distinct new sweet-pea color, which might be called a geranium pink—the softest and daintiest of all pinks—with its exquisite delicacy still further enhanced by a lemon keel.

Pkt. 20c; ½ oz. 75c; oz. \$1.45;
¼ lb. \$4.50

1857 Royal Blue

A true Royal Blue, but full of life and brilliancy instead of dull and uninspiring, undoubtedly the brightest of all sweet pea dark blues. A flower of great substance and enchanting beauty, extremely prolific in fours.

Maule's Gorgeous Zinnias

(Youth and Old Age) Hardy Annual

Zinnias begin to bloom early in the summer and continue profusely until frost, requiring no attention and succeeding almost anywhere. A general favorite enjoy-

ing a wide popularity, very desirable for garden use and especially useful for cutting, having long stems and good keeping qualities.

2065 Zinnia, Maule's Mammoth Dahlia-Flowered, Mixed Colors

Mammoth Dahlia-Flowered Zinnias

The latest development in this wonderful flower which is gaining in popularity far beyond expectations. The flowers have a close resemblance to Decorative Dahlias, often measuring 3 to 4 inches in depth and averaging 6 inches across. The petals are broad and closely imbricated.

2055 Crimson Monarch. The largest and best red; flowers immense and of fine form. Holds its color well.

2056 Canary Bird. A delicate shade of primrose. Very large, holding its color well until out of bloom. A free bloomer.

2057 Exquisite. Light rose with centre a deep rose; by far the most pleasing color for cutting. Truly Dahlia-flowered.

2059 Golden State. Yellow in the bud, turning to an attractive orange when in full bloom. A very desirable flower.

2060 Old Rose. A lovely shade of real old rose—a color that is most popular.

2061 Oriole. An immense orange and gold bicolor, changing slightly as it ages, but at all times worthy of the beautiful bird for which it is named. Plants are very vigorous.

2063 Polar Bear. A very large pure white of true Dahlia-flowered form and size; best white yet seen in Zinnias.

Any of the above named varieties of Dahlia-Flowered Zinnias, Pkt. 25c; 1/16 oz. 60c; 1/8 oz. \$1.00; 1/4 oz. \$1.75; 1/2 oz. \$3.00

All Maule Seeds teem with Vigorous, Abundant Life; Always they are Tested and Guaranteed

Maule's Bulbs, Roots, Etc.

Plants are easily and quickly grown from Maule's bulbs and roots. With but little care, excellent results may be obtained. A generous supply of bulbs, roots and plants may be obtained at a very small outlay, for the first cost is practically the only expense.

With every order for bulbs or roots a copy of our booklet, "Practical Hints on Bulb Culture," will be enclosed free. It contains many helpful suggestions on the culture of bulbs and roots. By following the simple directions given, everyone should succeed in growing beautiful plants.

Important: Many of our customers order bulbs and roots during the winter months to plant in pots for house culture or to start into growth so as to have them ready to set out-doors when conditions are favorable. We will, therefore, on receipt of all orders, send such bulbs and roots as may be planted indoors or which, if not wanted for im-

mediate planting, can be safely kept until the proper outdoor planting time.

Perennial Plants and Roots, such as Peonies, Phlox, Iris, etc., will be sent direct from our nursery at your proper outdoor planting time. All Bulb, Root and Plant orders will be handed in the above-mentioned manner unless your instructions to the contrary are clearly specified at time of ordering.

Maule's Large Flowering Cannas

Vigorous 2- to 3-eye Field-grown Roots

For bedding purposes, Cannas stand at the head of the list. No more satisfactory plant could be found; they succeed in all parts of the country, in any kind of soil, but will, of course, do better in rich soil, and if freely watered at all times. In recent years, Cannas have been constantly improved. The

newer types have flowers six to eight inches across, in great clusters of varied and rich colors, borne continuously all summer. The ultimate height given for each Canna may vary with climate and care.

As you will note, a substantial reduction has been made. At this low price, no excuse can be given for not having cheerful plants in your home.

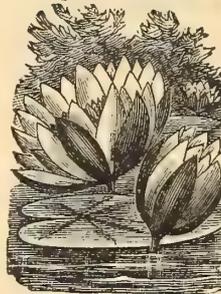

72B58 Nymphaea, Odorata or Water Lily Roots

(The Well-Known Native White Pond Lily)

Roots are taken from our ponds as early in the spring as it is possible to get them out. Place your order early, and we will send them when ready, usually in the month of May; sometimes a little earlier, depending on weather conditions.

Flowers pure white and fragrant; widely popular. It is only necessary to set the roots in the mud, where the plant is sluggish in the stream, after which the plant will require no further attention. Perfectly hardy, living in ponds or streams all winter. Where a stream or pond is not easy of access, roots can be grown in a tub, removing the tub to the cellar over winter. Our Bulb Culture Booklet gives full cultural directions.

74B99 Surprise Collection 75 Bulbs for Only \$2.00

All Properly Labelled
For Delivery After May 1

The supply of some of our Bulbs is exhausted before our selling season is over, while large quantities of other varieties are left on hand, for it is practically impossible to sell out all.

Rather than replant these "left-over" bulbs, we will put them up in "Surprise Collections," 75 bulbs in each collection, and offer the collection for only \$2.00, postpaid.

These collections will be entirely of our selection, from varieties of which we have a surplus. All bulbs will be of first-class quality, properly labelled. Orders will be filled in rotation as received, after May 1. The first orders will get the best selection, although all orders will receive more than twice the catalog value.

It is to your advantage to order this collection Early. At such a low price, no collection of surplus bulbs will be made up for less than \$2.00.

Maule's Hardy Perennial Phlox

Well developed plants sent direct from our Nursery

Perennial Phlox succeeds in almost any soil, but, of course, extra care in preparing and enriching the soil and watering plants in dry weather will result in better plants and flowers. If the first spikes of bloom which usually appear in July and

August, are removed as soon as over, the plants will produce a second supply of flowers, continuing the display until late in the autumn. They are perfectly hardy, becoming larger and more beautiful each year.

73N40 Phlox, Elizabeth Campbell

73N40 ELIZABETH CAMPBELL. Perhaps the most popular of all Hardy Phlox, on account of its outstanding color, which is a pleasing light salmon enlivened by a pinkish tint toward the center. Easily grown and exceptionally showy.

35c each; 3 for 95c; 6 for \$1.80; \$3.50 per doz.; 25 for \$6.90, postpaid

73N42 EUROPA. A strong grower, producing a mass of substantial upright stems crowned by large clusters of flowers. The blooms are white, with a fine light crimson eye in the center.

30c each; 3 for 85c; 6 for \$1.60; \$3.10 per doz.; 25 for \$6.00, postpaid

73N45 FERDINAND CORTEZ. An intense rich crimson shade with a brilliancy most appealing when seen in the bright sun. A vigorous grower. The individual blooms are of good size, forming a dense round head.

35c each; 3 for 95c; 6 for \$1.80; \$3.50 per doz.; 25 for \$6.90, postpaid

73N32 B. COMPTE. A very brilliant and showy variety of good strong growth and most profuse blooming. The individual flowers are large and combine into magnificent trusses of a brilliant French purple shade. This color is unusually bright and never fails to receive favorable attention. It looks best if planted in combination with some white variety.

35c each; 3 for 95c; 6 for \$1.80; \$3.50 per doz.; 25 for \$6.90, postpaid

73N48 MRS. WILLIAM JENKINS. Large, well-rounded flower-heads composed of mammoth size, snow-white blooms. By far the best of all white varieties.

30c each; 3 for 85c; 6 for \$1.60; \$3.10 per doz.; 25 for \$6.00, postpaid

73N52 RHEINLANDER. The beautiful, large carmine-pink flowers of this variety always attract attention. It is a free-blooming variety which makes a very large plant covered with flower-heads during the blooming season.

30c each; 3 for 85c; 6 for \$1.60; \$3.10 per doz.; 25 for \$6.00, postpaid

73N54 RYNSTROM. The individual flowers are very large and they combine into heavy, massive trusses of a bright rose-pink shade. An exceptionally strong grower, free blooming, and of showy habit.

30c each; 3 for 85c; 6 for \$1.60; \$3.10 per doz.; 25 for \$6.00, postpaid

73N56 THOR. A fine combination of bright and silky salmon-pink with a deep crimson eye in the center. The color contrast is very outstanding and pleasing to the eye. Thor is worth growing not only because of its excellent color but also because of its outstanding habit of growth.

30c each; 3 for 85c; 6 for \$1.60; \$3.10 per doz.; 25 for \$6.00, postpaid

Maule's Hardy Vines

All are strong two or three-year-old plants

93N08 Bignonia

(Trumpet Creeper)

RADICANS. Strong growing, bearing large clusters of orange red flowers, which always attract humming birds. Mostly grown on trees or walls. Useful for covering unsightly places, stumps or wherever a flowering vine is desired. For illustration, see page 77. Height 10 to 30 feet.

55c each; 3 for \$1.50;
6 for \$2.75; \$5.25 per doz.,
postpaid

93N02 Ampelopsis

VEITCHI (Boston, or Japanese, Ivy). A most popular climber, clinging firmly to brick, stone or other material, and will soon cover them with a sheet of handsome deep, glossy-green ivy-shaped foliage, which turns to crimson and gold in autumn. Rapid and luxuriant.
60c each; 3 for \$1.65; 6 for \$3.00;
\$5.50 per doz., postpaid

93N06 Aristolochia

Sipho (Dutchman's Pipe)

Makes a cool porch on a warm day. A vigorous and rapid grower with large, heart-shaped deep green leaves for which it is most valued. The curious brownish purple flowers resemble miniature pipes.

90c each; 3 for \$2.50;
6 for \$4.75; \$9.00 per doz.,
postpaid

93N35 Kudzu Vine

Will flourish where nothing else will grow. The most remarkable climber extant. In rich soil will grow 40 to 50 feet in one season. Starts into growth slowly, but after three or four weeks grows almost beyond belief. Leaves in shape like Lima Bean. Rosy-purple, pea-shaped flowers in small racemes. Fine for porches, arbors, old trees, etc. In extremely cold sections, should have protection.

50c each; 3 for \$1.30;
6 for \$2.50; \$4.75 per doz.,
postpaid

93N57 Wisteria

SINENSIS (Chinese Wisteria). Of rapid growth and attains a great height, often making a growth of 15 to 20 feet in one season. In May its flowers of soft, dainty lavender-blue are produced in pendulous racemes a foot or more long. One of the prettiest of all climbing plants. At times a few scattering blooms are borne in the fall.
75c each; 3 for \$2.00; 6 for \$3.75;
\$7.00 per doz., postpaid

93N65 Collection

One strong plant each of Bignonia, Clematis Paniculata and Honeysuckle (value \$1.55), \$1.25 for only..... postpaid.

Clematis

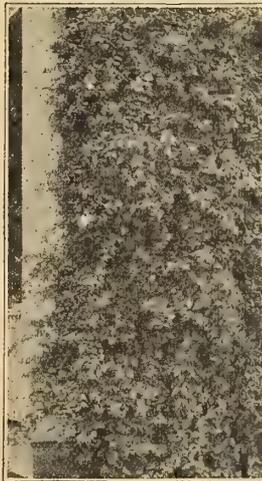

As beautiful and satisfactory as any vine you may plant.

93N13 JACKMANI. Sure to attract attention wherever grown. The large star-shaped purple blooms are produced with the greatest freedom from July until October. The plants make a vigorous growth and are suited for porches, arches, and walls.

90c each; 3 for \$2.50; 6 for \$4.75; \$9.00 per doz., postpaid

93N15 PANICULATA or SWEET SCENTED JAPAN. (Virgin's Bower.) Exceedingly fragrant, the sweetest of all clematis and one of the hardiest and easiest to grow. During August and September the plants resemble a sheet of feecy white, composed of numerous pure white star-like flowers. Even after the flowers have fallen, the feathery seed clusters give the impression of drifted snow. The plant may be used to good advantage for planting on rocky slopes. It quickly grows to a height of 15 to 20 feet, and spreads freely.

50c each; 3 for \$1.30; 6 for \$2.50;
\$4.75 per doz., postpaid

93N23

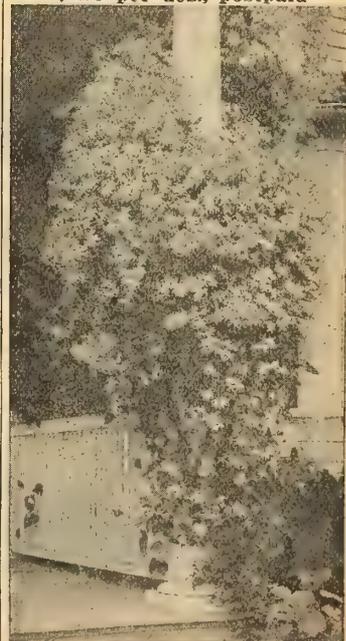

Honeysuckle

HALLIANA (Hall's Japanese). A strong, clean, neat grower, perfectly hardy, almost evergreen, with leaves that shine as if varnished; a constant and profuse bloomer. The flowers upon opening are practically white, changing to a soft rich yellow as they expand fully. Honeysuckle has always held a very important place in large as well as small gardens. The rich exquisite fragrance of the blooms is particularly noticeable toward evening.

Maule's Hardy Roses

Indispensable and generally popular among garden lovers
Instructions for planting, fertilizing, etc., sent with every order

Hardy Everblooming Roses

The so-called Everblooming Roses are the Hybrid Teas and the Teas. They do not bloom all the time, but if kept pruned and cultivated, one crop of flowers succeeds another at brief intervals throughout the summer.

They are among the most beautiful of all Roses. Although hardy, they do best if given some protection in winter. A light covering of straw manure is all that is necessary; or an equally efficient protection may be obtained by heaping soil, say, eight inches deep about each plant—removing same, of course, in early spring.

We offer below, in our opinion, a list of the most popular varieties—only such roses as have proved their worth in gardens throughout the country. They will do well in a great variety of soils and if properly cared for, will bloom the first year.

90N07 Columbia. D deservedly one of the most popular among rose-pink varieties. Immense flowers are slightly tinged with yellow at base of petals. Long, strong stems. Flowers, of great substance and fine lasting qualities, possess delightful fragrance.

90N13 Duchess of Wellington. The most popular yellow garden Rose. Intense saffron-yellow stained with deep crimson, changing to a deep coppery saffron-yellow as the flowers develop. The flowers are fairly full, with large petals, great substance, delightfully fragrant and very free-flowering. Pictured in colors on back cover. **\$1.00 each.**

90N19 Gruss an Teplitz. The one variety that is always in bloom. Succeeds well under most ordinary conditions. A bright, pleasing crimson. Splendid for bedding.

90N21 Hadley. Considered by many as being one of the best garden varieties of its color—a rich crimson, varying to deep velvety crimson. The flowers are well formed and fragrant. A free and continuous bloomer.

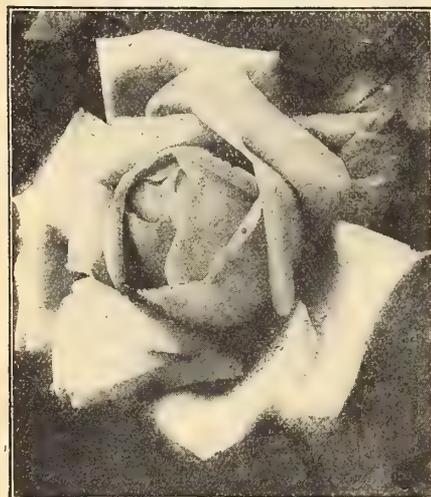

90N25 Jonkheer J. L. Mock. Clear imperial pink, reverse of petals rosy-silvery white. A giant of the La France type.

90N33 Kaiserin Augusta Victoria. After serving for a third of a century this still is, to our minds, the grandest white in cultivation. A continuous bloomer, producing quantities of snow-white flowers tinted with just enough lemon in the center to relieve the white. Remarkably fragrant.

90N39 Killarney Brilliant. A rich glowing shade of rosy-carmine. Flowers of true Killarney type. Splendid grower and free bloomer.

90N43 Lady Hillingdon. One of the most popular varieties, producing yellow flowers of a particularly pleasing apricot shade. It is one of the most free flowering and fragrant of the yellow varieties.

90N47 Los Angeles. The following is the originator's description, all of which we fully endorse: "Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of luminous, flame-pink, toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Maréchal Niel. The buds are long and pointed, and expand into a large flower; the color is maintained from the bud until the last petal drops." See back cover for colored picture of this wonderful Rose. **\$1.00 each.**

90N93 Willowmere

90N85 Souv. De Claudius Pernet.

Another season's reports from all sections see this peerless rose emerge triumphantly as the most dependable golden-yellow garden rose of today. The color is a most striking sunflower-yellow; deeper in the center, without any color blending. It is equally charming in bud, or while opening, and after fully blooming. The plants grow freely, and produce flowers liberally. It has very attractive green foliage. See back cover for colored picture of this wonderful Rose. **\$1.00 each.**

90N87 Sunburst.

Long, lovely buds, which open to large, perfectly formed and double flowers of sulphur yellow, make this one of the most attractive varieties in its color class. Strong plants of spreading habit; quite hardy, but in common with the majority of yellow roses appreciates protection in cold sections.

90N93 Willowmere.

Rich shrimp pink, shaded yellow in the center, and toning to carmine-pink toward the edges of petals. Long, carmine coral-red buds, carried on long, stout flower stems; very large flower, full and of elongated cup-shape.

Any of the above Everblooming Roses, except where noted.
90c each; 3 for \$2.50; 6 for \$4.50; \$8.50 per doz., postpaid

2-Year-Old
Heavy, Healthy
Field-Grown
Plants

90N50
Mrs. Aaron Ward
One of the most dependable of all garden roses

90N51 Mme. Butterfly. Fine, light pink buds and flowers, tinted with gold near base of petals; exquisite shape; richly perfumed.

90N55 Mme. Edouard Herriot. The buds are coral-red in color, shaded with yellow at the base; the medium-sized, semi-double open flowers, are coral-red, shaded yellow and bright rosy scarlet, passing to shrimp-red. A glorious color combination.

90N59 Mrs. Aaron Ward. Its deep Indian yellow flowers, agreeably shaded in various tints of orange, are produced throughout the season. The long and shapely buds are particularly attractive. One of the most dependable of all garden roses.

90N63 Ophelia. Salmon-flesh, shaded rose, with chamois-color center. The buds and flowers are beautifully formed and admired by everyone.

90N71 Radiance. One of the most gorgeous American sorts as yet introduced. The large, finely formed flowers are brilliant carmine-pink with salmon-pink and yellow shadings at the base of the petals. Produces its flowers when other varieties fail. Pictured in colors on back cover. **\$1.00 each.**

90N79 Red Radiance. A bright cerise-red form of the popular Radiance Rose. Pictured in colors on back cover. **\$1.00 each.**

Maule's Hardy Hybrid-Perpetual Roses

Two-Year-Old Heavy Field-Grown Plants

Popularly Known as June Roses

These roses do not require winter protection, dependably hardy as far north as Alaska. They bloom profusely in June and early July and again in the fall if properly pruned and fertilized and if the soil is well cultivated. Instructions for pruning, fertilizing, etc., sent with every order.

91N06 AMERICAN BEAUTY. Rich dark carmine, a beautiful Rose under favorable conditions; large, globular and fragrant.

91N24 FRAU KARL DRUSCHKI (White American Beauty). Color pure, snow white, with long buds and immense, perfectly double wax-like flowers.

91N36 GENERAL JACQUEMINOT (Jack Rose). Buds and flowers are considered models of perfection and its brilliant crimson color is the standard by which other crimson roses are judged.

91N72 PAUL NEYRON. Perhaps the largest of all roses, a single blossom often measuring 5 to 6 inches across. Color is clear pink, shading to rose. Sometimes termed the peony rose.

91N78 PERSIAN YELLOW. Deep golden-yellow, semi-double, very fine; perfectly hardy.

91N81 ULRICH BRUNNER. A brilliant cherry red. Very fragrant; immense size; popular.

91N86 Special Collection Offer

Hardy Climbing and Rambler Roses

Grow Rambler and Climbing Roses on Unsightly Buildings and Fences or to Cover Porches, Arbors, Arches, Pergolas, Clothes Posts and Old Tree Stumps

Four Famous Ramblers

92N05 DOROTHY PERKINS. Flowers are perfectly double, with petals crinkled; clear shell-pink and borne in immense clusters that cover the bush. Strong grower, very hardy.

92N10 EXCELSA (Red Dorothy Perkins). The color is intense, brilliant crimson. Flowers are large and double, produced in clusters of thirty to forty each. An improved Crimson Rambler.

92N15 FLOWER OF FAIRFIELD. A truly everblooming Crimson Rambler, practically mildew-proof and of hardest constitution.

92N20 GARDENIA (Hardy Marechal Niel). The very pretty pointed buds of this rose are nankeen yellow, turning to waxy white when expanded. Hardy, blooms profusely.

Five Lovely Climbing Roses

92N14 CLIMBING AMERICAN BEAUTY. Retains the deep pink to crimson color, and the same delightful fragrance of the bush rose. An early and wonderfully free bloomer, the flowers being borne either singly or in clusters of three. Of fine form.

92N28 DR. W. VAN FLEET. Delicate, shell-pink, mildly perfumed flowers are produced abundantly. The charming buds are large and pointed, while the open blooms are large and most attractive.

92N42 MARY WALLACE. Well formed, semi-double flowers of a bright clear rose-pink with salmon base to the petals, flowers large, generally exceeding four inches in diameter, very free flowering.

92N56 PAUL'S SCARLET CLIMBER. The brightest red, hardy climbing rose in existence. The flowers, a vivid scarlet, are of good size, semi-double, very freely produced in clusters of from 3 to 20 flowers each; the plants being literally covered from top to bottom with bloom.

92N70 SILVER MOON. Buds are exquisite in form and color, and its many semi-double flowers are pretty and decorative, opening a soft nankeen yellow and quickly changing to pure silvery white; are four inches or more in diameter and slightly perfumed.

92N05 Dorothy Perkins Rambler

HEDGE PLANTS

Two-Year-Old Well-branched; well-rooted

California Privet—More largely planted for ornamental hedges than any other shrub

What fence can compare in summer with the cool walls of a well-kept California Privet or in the fall with the fiery flames of Barberry, or its berries a few months later?

95N22 California Privet

The popular hedge plant, with glossy deep green leaves. Stands shearing well and are readily trained to various shapes.

95N87 Red Leaved Barberry

The foliage of this new variety is bright red, changing in the fall to vivid orange and reds of various hues. There is but one special cultural requirement: **the plant must be put where it has full exposure to the sun.** Specimen plants on the lawn are very showy. Having been but recently introduced we can supply strong one-year-old plants only.

Maule's Hardy Flowering Shrubs

Extra selected, well developed, bushy 2-yr.-old plants
As the slogan of the American Association of Nurserymen aptly puts it—"It's not a Home until it's planted." The proper utilization of ornamental shrubs and trees adds mightily to the attractiveness of the home surroundings. The following list of Shrubs lend themselves ideally to beautifying the home grounds.

94N30 Deutzia, Pride of Rochester

Makes a well-shaped bush and produces a wonderful display of large double white flowers all during the month of June. Of upright growth, attaining a height of 6 to 8 feet and a spread of 5 feet. A great favorite.

60c each; 3 for \$1.60; 6 for \$3.00;
\$5.50 per doz., prepaid

94N27 Flowering Crab Bechtel's

Showy dwarf ornamental tree bearing large, double, fragrant clear pink flowers followed by ornamental fruits. Blooms profusely from the middle of May until early June. Very hardy, easily grown, and exceptionally fine as specimens on the lawn.

\$1.25 each; 3 for \$3.25; 6 for \$6.25;
\$12.00 per doz., prepaid

Hydrangea

94N42 ARBORESCENS GRANDIFLORA (Snowball Hydrangea). From early in June until late in August it bears great clusters of white flowers, much like the tender Hydrangea in size and form; it will grow to perfection in partial shade; attains a height of 4 to 6 feet.

94N45 PANICULATA GRANDIFLORA. Considered the most popular of all shrubs. They are extensively used for yard, lawn and hedge planting and for screens. Attains a height of 5 to 7 feet; hardy in all localities; blooms the first and every season in July and August, and continues in bloom for two or three months. The flowers, which are borne in dense, pyramidal panicles a foot long, in greatest profusion, are white when they first open but gradually change to rich, coppery-red and remain in good condition for weeks.

Either of the above Hydrangeas: 70c each;
3 for \$1.85; 6 for \$3.45; \$6.40 per doz., prepaid

94N45 Hydrangea, Paniculata Grandiflora

Althea (Rose of Sharon)

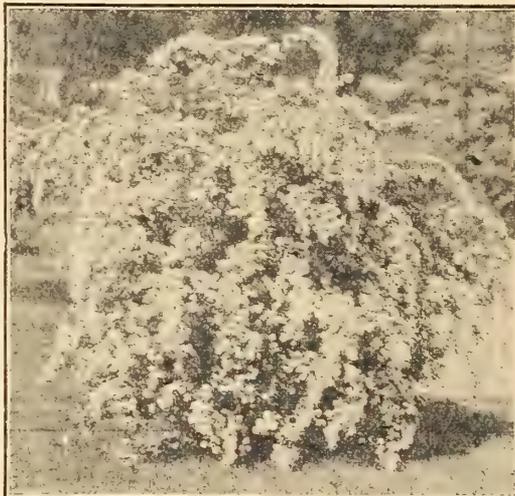

May be grown as specimen plants or used for screens and tall hedges, for which they are admirably adapted. Grow 6 to 8 feet, bloom from August to October, a period when few shrubs are in flower. We offer in four distinct colors. 94N03 Pink. 94N06 Purple. 94N09 Red. 94N12 White.
Any color; 60c each; 3 for \$1.60; 6 for \$3.00; \$5.75 per doz., prepaid

94N21 Butterfly Bush

(Buddleia Variabilis Magnifica)

One of the most desirable of summer-flowering shrubs, beginning to bloom in July and continues until cut down by severe frost. The long, graceful stems terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 12 to 15 inches long. Succeeds everywhere; flowers freely the first year. Grows to a height of from 5 to 6 feet. In cold localities the top usually freezes back and new growth starts from the root.

60c each; 3 for \$1.60; 6 for \$3.00;
\$5.50 per doz., prepaid

94N75 Spiraea, Van Houttei—The famous Bridal Wreath

Spiraea

94N72 ANTHONY WATERER. Of dwarf, dense growth, never exceeding 30 inches in height and blooms the entire summer and fall, if the old flower-heads are removed. Flat clusters of purplish-crimson flowers. 70c each; 3 for \$1.80; 6 for \$3.45; \$6.40 per doz., prepaid

94N75 VAN HOUTTEI. One of the choicest flowering shrubs; a fountain of white when in flower; beautiful as a specimen plant; fine for hedges, lining driveways. Blooms in late May and early June. Grows 6 to 8 feet high. 60c each; 3 for \$1.60; 6 for \$3.00; \$5.50 per doz., prepaid

94N81 Snowberry

An old favorite. In July and August it has small pink flowers, which are followed by great numbers of large, pure white, waxlike berries in clusters that remain until freezing weather. Conspicuous and interesting. The well-rounded bushes grow from 4 to 5 feet tall. Valuable for shady places.

60c each; 3 for \$1.60; 6 for \$3.00;
\$5.50 per doz., prepaid

94N36 Forsythia, Fortunei (Golden Bell)

Strong upright grower bearing heavy canes literally covered with golden yellow, star-shaped flowers, which burst into bloom early in the spring, before the leaves appear. Grows 5 to 6 feet, but may be kept pruned lower.

60c each; 3 for \$1.60; 6 for \$3.00;
\$5.50 per doz., prepaid

Lilac or Syringa

Old time garden shrubs, whose flowers never fail to charm with their delicate beauty or refresh with their fragrance. We offer two of the common varieties of Lilac, but will be pleased to quote prices on named varieties to those interested. The lilac makes a dense growth from 6 to 10 feet high.

94N51 Purple. 70c each; 3 for \$1.85; 6 for \$3.50; \$6.50 per doz., prepaid

94N54 White. 75c each; 3 for \$2.00; 6 for \$3.75; \$7.00 per doz., prepaid

J. H. Hale
Peach

PEACHES

Ripening in the order given. Plant 18 feet apart each way.

96N41 CARMEN. The earliest standard variety of merit. Creamy white or pale yellow skin, with deep blush. White flesh; semi-cling stone. Prolific bearer and valuable for market.

96N43 ROCHESTER. A valuable, extra early, yellow peach that begins to bear quite young. The fruit grows to immense size, is a beautiful orange yellow, blushed and mottled with dark red spots. The yellow flesh is very juicy and highly flavored. Freestone. Middle of August.

96N47 BELLE OF GEORGIA. A very large, mid-season white freestone which ships well. Skin white with red cheek; flesh white, firm and of excellent flavor. Does wonderfully well in a semi-southern climate.

96N51 J. H. HALE. In season of ripening it bridges the gap between Rochester and Elberta. The peaches are very large, of round shape, with a deep golden yellow skin overlaid with carmine; flesh is golden and of high quality. Equally useful for home use or market, of great value everywhere because of its firmness and fine flavor.

96N55 ELBERTA. Midseason. Fruit large, skin golden yellow with deep red cheek. Flesh yellow, very fine grain, juicy, rich, sweet and splendidly flavored, a perfect freestone. Best known and most largely grown. Does well everywhere.

96N59 LATE CRAWFORD. Large, yellow with red cheek; flesh deep. A large and beautiful late peach which is recommended for the home orchard. Round in form, flesh yellow.

96N05 BALDWIN. Standard fruit for American and export markets. Early winter; dark red; high quality.

96N09 DELICIOUS. No other sort has so completely won the country on the basis of sheer merit as has "Delicious." The apples vary slightly in shape and coloring in different sections and on different soils. An early and profuse bearer. Fruit large, dark red over a yellow ground, flavor of the finest.

96N13 GRIMES' GOLDEN. Golden fruit, famous for its superb flavor. Early winter. The best of the yellow apples.

96N15 JONATHAN. Bright red, fine flesh, and flavor, medium size, bears while young, and is often used as orchard fillers. Early winter.

96N19 McINTOSH. A deep red apple of large size; flavor extra good. Considered ideal by many. Fall.

96N23 STAYMAN'S WINESAP. One of very best money-making winter apples; quality of the best. Deep purple red.

96N32 YELLOW TRANSPARENT. Very early yellow summer apple; tart and pleasant flavor; roadside or nearby market favorite. July.

98N32 Strawberry, Premier

Strawberries

June-Bearing

Strawberries will grow in any climate and thrive in most any soil, provided it is not low and sour. As a matter of fact, Strawberries are the berry delight for every man's garden.

98N32 PREMIER. Leading growers claim it to be the best early and best money maker of them all. Has no weak points. An excellent shipper and also fine for home garden. Begins to ripen early and continues well into midseason.

98N34 JOE. (Joe Johnson or Big Joe). Very large, medium red, good quality. Especially adapted to poor, sandy soil. Claimed by many to be the best for market or home use.

98N36 SENATOR DUNLAP. Large, attractive fruit. Medium early.

98N38 GANDY. Large, bright red berries. Very late. Extensively planted.

Everbearing Strawberries

For best results (though this is not essential), plants should be disbudded up to July 1 after the main June crop is past. They will then bear crops beginning early in August and continue to produce delicious berries right up until severe freezing weather.

98N45 MASTODON "The Wonder-berry." We find this to be truly the largest, most delicious and heaviest yielding of all Everbearing sorts. It outyields some of the finest June bearing sorts during their season and continues to bear, throughout summer and fall, berries of amazing size and surpassing quality.

52X28 SACCO Makes Things Grow

Those thin spots in the lawn that you have tried so hard to build up—those scraggly shrubs, rose bushes and plants that just won't fill out—they need Sacco. Sacco has many times the actual plant food value of ordinary manure and is free from offensive odors. A single application brightens a lawn in one week's time and produces an extraordinary growth and bloom among flowers and shrubbery. Also excellent for the vegetable garden. Easy to apply. Full directions on each package.
